APPRECIATIONS

I am very glad to take this opportunity of expressing my appreciation of this excellent work, which, courageously undertaken in a time of great difficulties, has now been brought to its present successful issue.

No one will dispute value of the services which a publication such as this renders to the great causes of education, of learning, and of science, which, by bringing together in one volume accurate and well-proportioned accounts of the activities of the great Universities of the world, its Academies, Observatories, Librairies, Museums, and Learned Societies, keeps in touch all those who in their different ways are seeking to extend the boundaries of knowledge. To do this is not only to render a service to Education ; it is a service, and one of the most promising and fruitful, to civilization itself.

But, though the value of such a work will be readily admitted, not all those who so gladly utilise it can, I think, realise fully what the enterprise entails upon the editor and the publishers. To ensure accuracy — and as far as I have tested it this work is remarkably accurate — there must be countless communications between the editor and his correspondents all over the world, the closest scrutiny of the information received, and minute attention to detail on the part of editor and printer. And accuracy is not all. Vision and imagination are required, so that not only shall the multitudinous facts be accurate, but the facts shall be of the sort that are needed by the scholar, the administrator, and all concerned in the development of Higher Education.

In all these respects success has most decidedly been achieved, and I congratulate the editor and those associated whith him on the results.

(Signed) : H. J. Waring.
Vice-Chancellor of the University of London.

The Preface of the Rector of Paris makes it unnecessary to explain the nature and origin of this book.

The « Index Generalis » is a work almost indispensable to those in any country who desire information about the institutions of higher learning in other countries. The editors have undertaken under difficulties to supply a need, and they have shown energy and industry in a large task which they have brought to a successful conclusion.

The book is a necessity for every library of importance and of very great service to all teachers and students.

Director of the American University Union, Continental Division.

BRITISH EMPIRE

English Universities and Institutions of Higher Learning

INTRODUCTION

It is not possible for us to give general information about the organisation of studies which would be applicable to all the British Universities, as we do in the case of those of France, Italy, Spain, and United States of America. We have taken as an example the University of London. Although, of course, each University has its own special character, the information which we give regarding the University of London may be taken as *generally* applicable to the others of the British Empire; but for details regarding any particular University, application should be made direct to its authorities.

GENERAL INFORMATION

I. — Constitution and Administration.

There are eight *Faculties* in the University, namely : — (1) Theology (2) Arts, (3) Laws, (4) Music, (5) Medicine, (6) Science, (7) Engineering and (8) Economics and Political Science (including Commerce and Industry). Membership of the Faculties is restricted to Teachers of the University.

Boards of Studies exist for the various subjects of University study. Each Board consists partly of teachers of the subject and partly of external experts. There are at present forty-five Boards of Studies. The chief duties of the Boards are to report the Senate through the Academic Council and the Council for External Students, on matters relating to Appointement of Examiners, Courses of Study, and Regulations for Examinations.

The number of Appointed and Recognised Teachers in September 1928 was 1102 (including 271 Appointed Teachers) ; and the number of Registered Internal Students for the Session 1927-1928 was 9,662.

As a general rule, the Session at Schools of the University is divided into three terms. It begins in October and ends in June or July, with vacations of two or more weeks at Christmas and Easter. At the Medical Schools the teaching year is usually divided into two Sessions, *viz.*, from October to the end of March and from April to July.

II. — Admission of Students.

The following Students are registered by the University as " Matriculated students " *viz.*

(1) Students who have passed the Matriculation Examination of the University in its ordinary form, or who have passed the Senior School or the General School Examination in the subjects required by the Regulations for Matriculation, at one and the same Examination.

(2) Students who have passed the special University Entrance Examination.

(3) Students who have obtained exemption from the Matriculation Examination in accordance with the University Regulations and have paid a registration fee of three guineas.

The fee payable to the University at each entry to the Matriculation Examination is three guineas, with an additional local fee for candidates examined at Provincial Centres.

III. — Exhibitions and Scholarships.

A Student who desires information with regard to Exhibitions, Scholarships, Studentships, and Prizes awarded by the University, should apply to the University for a copy of the Scholarships Pamphlet.

IV. — Degrees.

Before a student is allowed to enter for the Final Examination for any Degree as an Internal Student, he must (unless admitted as a post graduate student after a two years' Course) have completed an Approved Course of Study extending over at least three years; and before a Student is allowed to enter for any Examination as an Internal Student, he must (unless special exemption has been granted to him) produce a Certificate of attendance at a Course of Study for the Examination, composed of Instruction Courses in all the subjects of the Examination.

A Candidate for the Doctor's Degree in any of the Faculties must have taken the Bachelor's Degree at least two years previously. Further, unless exempted by the Senate, a Candidate for the Degree of Doctor of Literature or Doctor of Science must have taken the Master of Arts or Master of Science Degree respectively or the Ph. D. Degree A thesis is usually required.

The usual fee for entry to an Intermediate or Final Examination is six guineas; and for the Doctor's Degree, twenty guineas. Exceptions to these rules, and the fees for other Examinations, are specified below.

A Candidate for the Ph. D. Degree must have previously graduated in the Faculty of Theology, Arts, Music, Science, Engineering or Economics, or have been registered as a Candidate for the Degree under the terms of the Regulations for Post graduate Students.

Faculty of Theology.

The University confers the Degree of Bachelor of Divinity (B.D.), Doctor of Philosophy (Ph. D.-Theology) and Doctor of Divinity (D.D.).

The Intermediate and Final Examinations are held in June.

Honours in Theology can only be taken after the Pass Degree Divinity. The Honours Examination is distinct from the Pass Examination, and in the case of a Candidate who has taken the B. D. Degree as in Internal Student, a year's further course of study is not required. Honours may be taken in one subject only at any one Examination, but a Student may take Honours in other subjects not exceeding two at subsequent Examinations. The subjects for Honours are as follows — Hebrew and Aramaic including Syriac; Greek New Testament and Apocrypha; Church History; Biblical and Historical Theology; the Study of Religion.

Candidates for the D. D. Degree must have taken Honours in Theology.

An Academic Diploma in Theology is awarded.

The course in Theology may be taken at Hackney and New College Hampstead; King's College Theological Department; Wesleyan College Richmond; and St John's Hall, Highbury.

Faculty of Arts.

The University confers the Degrees of Bachelor of Arts (B.A.), Master of Arts (M.A.) Doctor of Philosophy (Ph.-D.-Arts) and Doctor of Literature (D. Lit.). A Diploma in Pedagogy, entitled the Teacher's Diploma, is awarded. Diplomas are also awarded in Anthropology, in Archaeology, in Fine Art, in Geography, for Journalism, in Librarianship, in Psychology, in Slavonic Studies, in Town Planning and Civic Architecture, and in Town Planning and Civic Engineering.

Honours Students are not required to take the B.A. Pass Examination.

For the M.A. Degree a Thesis is required (except in Mathematics for which it is voluntary) and in some cases Candidates must have taken Honours at the B. A. Examination. The subjects in which the M. A. Degree is conferred are as follows: —

Classics ; Archæology ; Mathematics ; Mediæval and Modern Languages ; Oriental Languages ; Comparative Philology ; Philosophy ; Psychology ; History ; Geography ; Sociology ; Education. The M. A. Examination is held in May and December except in the case of Education, the Examination for which is in May only) and the fee is 10 guineas.

The D. Lit. Degree is open to Masters of Arts and Doctors of Philosophy only unless special exemption is granted and is conferred for original work.

The Course in Arts may be taken at University College ; King's College ; Royal Holloway College ; Bedford College for Women ; East London College ; Westfield College ; Birkbeck College ; and Courses in Oriental Languages are provided at the School of Oriental Studies. Approved Courses in Arts subjects are given at other Institutions.

The Examination for the Teacher's Diploma in Pedagogy is open only to Graduates of this and other approved Universities and to others holding qualifications of a similar kind as set forth in the detailed Regulations. The Course for the Teacher's Diploma extends over at least one year. The Examination for the Teacher's Diploma is held in July ; fee, six guineas.

The Course in Pedagogy may be taken at King's College ; London Day Training College ; Goldsmith's College ; Furzedown Training College ; Maria Grey Training College ; St Mary's College.

Faculty of Laws.

The University confers the Degrees of Bachelor of Laws (LL. B.) Master of Laws (LL. M.) and Doctor of Laws (LL.D.).

The LL. B. Examination is held in July and the LL. M. Examination in September.

Candidates for the LL. D. Degree must have taken the LL. M. Degree, unless specially exempted.

Approved Courses in Laws may be taken at University College, King's College, and the London School of Economics, under a joint scheme.

Faculty of Music.

The University confers the Degrees of Bachelor of Music (B.Mus.) and Doctor of Music (D.Mus).

All the Examinations in the Faculty of Music are held in December.

Approved Courses in Music are provided at the Royal Academy of Music ; the Royal College of Music ; Trinity College of Music ; Battersea Polytechnic ; and Chelsea Polytechnic.

Faculty of Medicine.

The University confers the Degrees of Bachelor of Medicine and Bachelor of Surgery (M. B., B. S.), Bachelor of Dental Surgery (B. D. S.) Bachelor of Pharmacy (B. Pharm.), Doctor of Medicine (M. D.) and Master of Surgery (M. S.).

The Course in Medicine extends normally over five and a half years. In the first year Courses in Inorganic Chemistry, Physics, and General Biology, in preparation for the First Examination for Medical Degrees are taken, the Examination being held in July and in December (fee 6 guineas). Organic Chemistry is studied with the subjects of the Course for the Second Examination for Medical Degrees, Parts I and II, in the first half of the second year and is the only subject at Part I of the Second Examination, taken normally six months after passing the First Examination, the Examination being held in March and July (fee, 7 guineas). The second and third years are devoted to Organic Chemistry (as explained above), Human Anatomy and Embriology, Physiology, Pharmacology, and the Second Examination for Medical Degrees, Part II (fee, 9 guineas), is normally taken two and half years after Matriculation, the Examinations being held in March and July.

In the Final Course for the M. B., B. S. Degrees (the two Degrees must be taken together) the subjects are Medicine, Surgery, Obstetrics and Gynecology, Pathology, Forensic Medicine and Hygiene. The M. B., B. S., Examination (fee, 12 guineas) may be taken in two Groups (fee, six guineas for each Group), and is held in May and November.

The M. D. Degree may be taken in any of the following Branches : — (I) Medicine, (II) Pathology, (III) Psychological Medicine, (IV) Midwifery and Diseases of Women, (V) State Medicine, (VI) Tropical Medicine. The M. S. Degree may be taken in any of the following Branches : — (I) Surgery, (II) Dental Surgery. (III) Ophthalmology. (IV) Laryngology, Otology, and Rhinology. For the M. D. or M. S. Degree a thesis may be submitted, and may be accepted as exempting from a part of from the whole of the Written Examination, and (*a*) in the case of Pathology, from the Practical examination also, and (*b*) in the case of Tropical Medicine, only from the paper in Medicine and the Essay.

Courses for the First Examination for Medical Degrees are also provided at the Medical Schools (except Westminster, St. George's, Charing Cross, and King's College Hospitals) and at several other Institutions. Students of the Medical Schools of Westminster, St. George's, Charing Cross and King's College Hospitals attend one of the University Centres (University College and King's College) for Courses in Preliminary and Intermediate Medical Studies.

The Course in Dental Surgery extends normally over five years. The subjects of the Second Examination in Dental Surgery are Anatomy, Physiology, Special Anatomy and Histology, Pharmacology, It is taken normally seventeen months after the First Examination for Medical Degrees and is held in December (fee, six guineas). The Third Examination is in two parts, and the Course extends over one and a half years. The subjects of Part I are Pathology and Bacteriology, Medicine and Surgery and of Part II, Prosthetic Dentistry, including Dental Metallurgy. Part I is held in March (fee, six guineas), and is taken normally fifteen months after the Second Examination ; Part II is held in June (fee, two guineas), and is taken eighteen months after passing the second Examination. In the Final Course for the B. D. Degree the subjects are Dental Surgery, Operative Dentale Surgery, and Orthodontics. The Examination is held in July (fee six guineas) and is taken normally one year after the Third Examination.

Faculty of Science.

The University confers the Degree of Bachelor od Science (B. Sc.,) Master of Science (M.Sc.), Doctor of Philosophy (Ph. D. Science), and Doctor of Science (D.Sc.) ; also the Degree of B.Sc. (Agriculture), B.Sc. (Horticulture), B.Sc. (Veterinary Science), B.Sc. (Household and Social Science), and B.Sc. (Estate Management).

For the B. Sc. (General) Examination any three subjects may be selected from the following, *viz.*, Pure Mathematics ; Applied Mathematics ; Astronomy ; Physics ; Chemistry ; Geology ; Botany ; Zoology ; Physiology ; Psychology, General and Experimental ; Anthropology ; Geography ; Military Studies : Statistics.

A Candidate for the B. Sc. (Special) Degree is required to take a Principal Subject and a Subsidiary Subject. The general Examination is distinct from the special Examination, but at both examinations the sucessful candidates will be awarded First Class Honours, Second Class Honours, or a Pass.

Bachelors of science may, after the prescribed interval, proceed by Thesis and Examination to the M.Sc., Ph.D., and D.Sc. Degree in Science.

The M.Sc. or Ph.D. Degree may be taken in a Branch of Science within the purview of the Faculty of Science. A Thesis is required in all Subjects, except in Mathematics, for which it is optional.

The Course in Science may be taken at University College ; King's College ; Imperial College ; Royal College of Science ; Royal Holloway College ; Bedford College for Women ; East London College ; and Birkbeck College. Approved Courses are provided at Westfield College and at other Institutions.

For the B.Sc. Degree in Agriculture the subjects of the Intermediate Course are Chemistry ; Physics ; Botany ; Zoology. The subjects of the Final Course are Agriculture ; Agricultural Botany and Agricultural Engineering.

The Course in Agriculture may be taken at the South-Eastern Agricultural College, Wye.

The Course for the B.Sc. Degree in Horticulture extends over three years and consists of training in Practical as well as Scientific Horticulture. The subjects of the Intermediate Course are Chemistry ; Botany, Zoology ; Applied Physics ; Surveyng ; Geology. The subjects of the Final Course are Practice and Principles of Horticulture ; Bookkeeping ; Entomology.

The Course for the B. Sc. Degree in Veterinary Science extends over four years, and there is an Examination, at the end of each year of the Course.

Approved Courses in Veterinary Science are provided at the Royal Veterinary College.

Bachelors of Science in Agriculture, Horticulture, or Veterinary Science may, after the prescribed interval, proceed by Thesis and Examination to the M.Sc., Ph.D., and D.Sc. Degrees in Science.

The B. Sc. Degree in Household and Social Science, is open to Internal Students only. The Course extends over three years and gives the preparation for students who may intend to enter upon professional careers either as Teachers of Household Science, or as Institutional Administrators.

The B.Sc. Degree in Estate Management is open to External students only.

Faculty of Engineering.

The University confers the Degrees of Bachelor of Science (Engineering) (B. Sc.) Master of Science (Engineering) (M. Sc.) Doctor of Philosophy (Ph. D.), Doctor of Science (Engineering) (D. Sc.), Bachelor of Science (Mining) (B. Sc.), and Bachelor of Science (Metallurgy (B. Sc.).

The Intermediate Course in Engeneering is taken by all the Students in the Faculty whether they intend to take the Degree in Engineering, Mining, or Metallurgy. The subjects are : (1) Pure Mathematics ; (2) Applied Mathematics ; (3) Heat, Electricity and Magnetism ; (4) Engeneering Drawing ; and (5) one of the following subjects. Sound and Optics ; Chemistry ; Geology. Five subjects are taken in the Final Course in Engineering, a wide choice being allowed. In the Final Courses in Mining and Metallurgy six subjects are required.

Faculty of Economics.

The University confers the Degrees of Bachelor od Science (Economics) (B.Sc.) Master of Science (Economics) (M.Sc.), Doctor of Philosophy (Economics) (Ph.D.), and Doctor of Science (Economics) (D.Sc.), also the Degrees of Bachelor of Commerce (B.Com.) and Master of Commerce (M.Com.). Academic Diplomas are awarded in Geography, and in Sociology and Social Administration.

Bachelors of Science in Economics may, after the prescribed interval, proceed by Thesis and Examination to the M.Sc., Ph.D., and D.Sc. Degrees in Economics.

The Course for the B.Sc. Degree in Economics may be taken at University College, and the London School of Economics. Approved Courses are also provided at King's and Birkbeck Colleges.

Commerce.

The Course for the Bachelor's Degree (B.Com.) extends over three years and must be taken at the London School of Economics and Political Science.

The Intermediate Examination is divided into two parts which may be taken on the same or on different occasions.

The subjects are : Part I (1) Element of Economics ; (2) Geography ; (3) an Approved Modern Language. Part II (1) English Economic History ; (2) either Accounting, or a second Approved Modern Foreign Language.

The B.Com. Examination is divided into two parts, Part I consisting of the Compulsory Subjects, and Part II being the Selected Group of Subjects.

The Subjects are : Part I : (1) The present Organisation of Industry, Banking, Trade and Transport ; (2) Elements of Commercial Law ; (3) Statistical Method ; (3) Modern Economic Development of the Empire ; (5) a selected subject. Candidates for the M. Com. Degree must have had practical commercial experience for not less than 2 years after passing the B.Com. Examination. The M. Com. Examination consists of written papers, an oral examination and a dissertation or thesis.

V. — Incorporated Colleges, Schools and Institutions.

University College, and King's College are incorporated in the University.

Certain public educational institutions are recognised as Schools of the University in one more of the Faculties.

Students of an incorporated College or School of the University are allowed to enter as Internal Students for the Examinations of the University in the Faculty in which the School is recognised, after taking an Approved Course of Study consisting of Approved Instructions-Courses in all the subjects of the Examination. Students of other Institutions are also allowed to enter as Internal Students of the Examinations of the University, provided they have attended satisfactorily approved Instruction Courses in all the subjects of the Examination given by Recognised Teachers of the University.

King's College, East London College, the London School of Economics, Birkbeck College, and a considerable number of the Institutions provide instruction in the evening. The Theological Schools, and some of the Medical Schools are for Men Students only. The London (R. F. H.) School of Medicine for Women; King's College of Household and Social Science: Royal Holloway College · Bedford College for Women and Westfield College are for Women Students only. The Royal Holloway College and Westfield College are mainly residential, and Bedford College for Women and the London School of Medicine for Women provide accommodation for a number of resident Students.

The Francis Galton Laboratory for National Eugenics, at University College. Director : Prof. **K. Pearson.**

Expenses. — Inquiries are frequently addressed to the University regarding the expenses connected with a course of study at the University as an Internal Student. *A satisfactory estimate of the average cost of living for students in London cannot be made*, but it may be said that expenses can readily be adapted to the tastes and means of individual Students. The cost of living will depend on the part of London in which the student proposes to live, and this again may depend to some extent on the School of the University at which he is studying. The principal expenses connected with the University Course, other than expenses for books, subscriptions, travelling and vacations, etc., are as follows.

Tuition Fees. — These vary considerably, according to the School or Institution to which the Student is attached and according to the Faculty in which he proposes to graduate.

Examination Fees, payable to the University for entry to Examinations — The minimum expense in fees for a first degree (including Matriculation is 14 1/2 guineas. In the Faculties of Medicine and Science (Veterinary Science), the total expense under this head will amount to more than 14 1/2 guineas. If a Student fail at any of the Examinations, there will be an additional fee for re-examination.

Regulations. — The following publications may be obtained postfree on application to the University :

Regulations for Matriculation :

Regulations for Internal and for External Students (published separately) for Degrees in Theology, Arts, Laws, Music, Medicine, Dentistry, Pharmacy, Science, Agriculture, Horticulture, Veterinary Science, Household and Social Science (*External only*), Estate Management (*External only*), Engineering, Mining and Metallurgy, Economics, Commerce, for the Teacher's Diploma, and for the Diplomas in Archæology, Anthropology, Bacteriology, Biology, Fine Art, Town Planning and Civic Architecture, Town Planning and Civic Engineering, Geography, Sociology and Social Administration, Librarianship, Slavonic Studies, Psychology, Public Administration, Theology and for Journalism. Also Regulations for Ph. D. Degree.

Scholarships Pamphlet, containing particulars of Exhibitions and Scholarships awarded by the University and by Schools of, and other Institutions connected with the University.

Applications for any of these publications should be addressed to the Principal, University of London, South Kensington. S. W. 7.

University Libraries.

The University possesses the following Libraries, viz : (1) The Libraries at the Central University Building at South Kensington (200,000 volumes), including the General Library, the Lady Wolley Library, and the Goldsmith's Company's Library of Economic Literature ; (2) the Libraries at University College, Gower Street, W. C. (300,000 books and pamphlets) ; and (3) the Libraries of other Institutions incorporated in the University.

UNITED STATES

THE AMERICAN UNIVERSITIES

For the most part, there have been included in this volume only *those American Universities, Colleges and Technical Schools which both appear on the official of the* Association of American Universities (*Carnegie Foundation*) *and prepare for the Masters and Doctors degres.*

An account, at the same time brief and adequate, of the American institutions of higher education, is rendered practically impossible by the endless variety of their types. There are in the United States more than five hundred universities, colleges and technical schools, which claim to give instruction going beyond that of the secondary chools. To be sure, a considerable number of these institutions are generally admitted to offer training scarcely superior to that of the best equipped High Schools: nevertheless, even disregarding such institutions, there remains a very large and varied group. In an effort to establish some standars of evaluation, the Carnegie Foundation made an investigation a few years ago which resulted in the publication of a list of 119 universities, colleges and schools whose degrees of Bachelor of Arts and Bachelor of Science were recognised as of such standard value that they were recommended as fullfilling the perequisites for graduate work. This list is printed in the 1913 proceedings of the Association of American Universiries. Even taking this list as the basis of our study, il it will be found that scarcely two universities, colleges or technical schools are exactly alike in their history, in their charters or constitutions, or in their internal organization, ideals and objects.

The origin of American institutions of higher education is extremely diverse. All the oldest of them have been founded by various religious sects, especiallly the dissenting Protestant sects, as schools for the training of their clergy and as centers of the liberal education of a laity always imbued with the general spirit of the sect maintaining the particular school. However, in the general evolution of education in the United States, many of these schools, foundede by ecclesiastical organization, have completely lost their sectarian bias; so much so that few Americans today, in thinking of Harvard, Yale or Princeton, recall that the two former colleges were founded by the Pilgrims and their descendants and the latter by the Scotch Covenanters and quakers. They have become strictly scientific institutions. The spirit of the old religious traditions still lives on only in the great emphasis laid on the formation of character as one of the essential functions of a university or college, a function quite as important as intellectual training.

The institutions of higher education, established and maintened by the different states, have so increased in number since 1830 that there is now scarcely a state which has not its own university and technical schools. In the Central and Wersten states, these states universities and schools arusually more largely attended and exert a greater influence on the intellectual life of the community than the endowed institutions.

There is also a large number of universities, technical schools and institutions for the promotion of research work, established by private initiative and supported by private munificence, but entirely in lependant both of ecclesiastical organizations and the state. Taey offer for the most part the highest type of scientific training. In this group fall not only the Johns Hopkins University, the University of Chicago and Leland Stanford Jr. University, but also the Rockefeller and Carnegie Institutes.

The great variety of higher schools in the U. S. is explained, on the one hand, by the great diversity of their origin, on the other hand, by the fact that the U. S. constitution, imbued with the principle of States Rights, entrusts the entire task of education (as it

entrusts the solution of so many other problems considered in Europe as strictly national questions) to the individual states. The government at Washington exercises no control whatsoever over education, whether primary, secondary or higher. Education is not yet recognised in the cabinet of the President by a separate portfolio: there is no higher council of education with administrative powers. The entire influence of the Central government on education is exercised indirectly through the Bureau of the National Commission of Education, a Bureau which has proved very valuable in gathering statistics about education in America and in cooperating in the standardizing and developing of universities and schools, but which has no administrative control over any of them. There are no higher schools established and controlled directly by the U. S. government except the U. S. Military Academy at West Point and the Naval Academy at Annapolis.

Even in the various states, the control exercised by the state government over the local institutions of higher education, especially those not belonging to the state, is very slight. Universities like Harvard, Yale, Princeton, Columbia, the University of Chicago and Leland Stanford Jr. University, are practically entirely independant of the local state administration within whose jurisdiction they find themselves. To be sure, in return for specific services rendered, for specific kinds of instruction undertaken, some state governments have granted to endowed universities and schools state aid; and this first step has led in several cases to a close cooperation between the state and the local higher schools. However, not even for the state universities and technical schools themselves is there always one central administration. More frequently each higher school is administered by its own board of trustees or council of administration. And these different boards or councils are usually, not responsible either to the State Superintendant of Public Instruction or to supreme state board of education.

It might seem that this absence of a central control and administration of higher education must result in complete anarchy. And it must be admitted that, from the standpoint of the more precise educational values and more systematic organization of higher education in most European countries, the American educational system lacks uniformity and definite standards. However, our higher education is far from being a chaos. Various voluntary associations of schools of various types, such as the Association of American Universities, the Association of American Colleges, the Association of American Professors, etc., exert a tremendous indirect influence towards standardizing the conditions of entrance to the higher schools, their courses of study, the quality of their instruction, the requirements for degrees, etc., and towards the permanency of appointments.

As a general rule, the final responsibility for the administration of each university or higher school rests in the hands of the particular social group, which has created it. In the case of the state universities, the members of the borad of trustees, board of regents or university council are usually either elected at large by popular vote, as are the judges of the state supreme courts, or appointed by the governor of the state. In either case the final responsability for the choice of the governing board rests with schools; the nucleus of the governin boards is constituted by a group of members which is self-perpetuating. However, there has been a strong tendency for many years to give to the alumni a larger and larger voice in the choice of the governing board; so that today in the older endowed universities like Harvard, Yale, Columbia and Princeton, the alumni elect at least a part of the members of the governing board, or elect an advisory council which cooperates with this board in the direction of the university. In only a few universities and colleges of strong sectarian nuance is the governing board elected or appointed by the governing body of the church to whicht it belongs.

The boards of trustees, board of regents, corporation, or whatever the governing body is called, is charged with the direct administration of the institution. If, as at Harvard University, there are two governing bodies, the Board of Overseers, elected by the alumni, and the corporation, self-perpetuating body, the former usually has the power of approval and confirmation, but the final decision rests with the latter. It is this board which elects the President, approves finally the appointment of all members of the administrative and teaching staff, makes up the budget, administers the finances and even exercises, through committees of its own members or others invited to serve, a supervision of the internal affairs of the various schools. The members of most self-perpetuating boards are elected for life; the members of boards elected by the alumni or by popular vote of the people, or appointed by the governors of the states, on the contrary, usually hold office five or six years with the possibility of re-election.

The president or chancellor of an American university, college or technical school is not only the titular head of the institution and its formal representative in the educational

and general social world : he is also usually the active driving force in its life, the initiator of its policies and the moulder of its fortunes. He is excepted to combine the administrative and financial ability of the man of affairs with the intellectual acumen of the scholar. For upon him depends not only the direction of the educational policy of the institution but also the administration of its business and financial affairs. If the institution is privately endowed, the president must see to it that, through appeals to the generosity of his alumni and friends the endowment is increased to meet the growing needs of modern educational requirements. If the institution belongs to the state, he must be able to present its claims before the state legislature, in whose hands alone rests the power of voting the funds necessary for its maintenance. An able American university or college president can change, mould and determine the cahracter of his school to an extent scarcely realizable by the head of a European institution of higher education.

In the determination of all questions of internal organization and educational policy, the president consults either a Senate, which is usually composed of the titular professors of all faculties and schools, or a University Council, made up of a number of professors elected by the various faculties. This Senate or University Council acts as the legislative body of the institution and can often modify or even thwart the plans of the president. However, the relation between the power and authority of the president and that of the Senate or Council is extremely variable : in some institutions the president can both legally and by tradition impose his will upon the Senate or Council, in others the Senate or Council can limite very definitely the president's power.

In all institutions which are composed of more than one college or department or school, there are as many deliberative bodies called faculties as there are colleges or schools, each faculty composed of all the titular professors in its own group. Other members of the teaching staff who have not the title of professor are usually invited to sit in at the meetings of their own faculty, and have the right tpo speak, but not to vote. Each faculty legislates whith reference to and decides all questions touching its own internal affairs.

Each college or school has its own dean or director who is occasionally elected by the members of the faculty over which he presides, but more often is appointed by the president with the approval of the governing board. The dean usually exercises a very considerable influence and power, not only in the organization of the courses and the direction of the policy of his faculty or school, but also in the appointment of heads or chairmen of departments of study and of members of the teaching staff.

Until a few ygars ago, all the work in a particular department of study as Romance languages or phylosophy, was under the direction of one professor who was responsible for the organization of the studies of his department and the scholastic results obtained. He also exercised a great influence in the choice and advancement of the members of the teaching staff in his particular group of studies. There has, however, manifested itself a strong tendency during the past few years to modify this system which permits of considerable arbitrariness, especially in the selection an advancement of professors, and to substitute for it a system much more democratic, in which each member of the departmental staff has an equal voice. In this new system the head of the department becomes merely the chairman of the group. In some institutions the chairmanship rotates among the different members of the department.

The history of higher education in the United States for nearly a hundred and fifty years was a history of its colleges. Not until the close of the American Revolution were studies in theology, medicine, law and science either separated from the regular curriculum of the Arts college to constitute a new professional faculty or school or were new faculites created to this same end.

As has been already remarked, the American colleges were nearly all established by different religious sects to train an educated clergy and, at the same time, to furnish a liberal education for the laity to the end of raising up a group of young men who might not only justify and defend the faith, but also assume the responsible positions of public life. The ideal of a broad, cultural education with a strong emphasis on the formation of character and preparation for public life, was a continuation of the English tradition. And even today, in spite of the difference in the details of internal organization, the American colleges resemble more closely the colleges of Oxford and Cambridge in their spirit and ideals than any other existing group of schools. This ideal of a cultural education explains the wide range of subjects offered and the freedom of choice allowed the student. It also explains the effort constantly made by college authorities to create an ddevelop within the college a social life broad and varied enough to take account of all the tendencies of youth and to give them adequate expression without the danger of their becoming perverted. Hence, the great encouragement given to athletic sports, debating societies, oratorical contests, amateur theatricals and social clubs and fraternities. The man with a

« college education » should be a cultured gentleman with wide range of knowledge and broad sympathies. He should be rather a highly socialized individual than a technically and exactly trained intellect. In this ideal is seen the influence of the English tradition.

Many professional schools in the U. S., especially schools of medicine and law, in requiringa college education as the condition of admission to their courses, have imposed upon the Arts college a new ideal, the preparation through undergraduate courses for entrance upon professional studies. This new demand has modified considerably the old ideal of a college education as a liberal training in literature, the sciences and the arts. Unwilling to accede to the new demand, a goodly number of American colleges have deliberately determined to continue the old tradition and to remain the repository of the old ideal. They do not *wish* to be transformed into universities.

Admission to American colleges is either by examination or by diploma from a recognised High School or college preparatory school. Several of the older universities of the East admit to their college department only on the basis of examinations, though there is now a marked tendency to grant at least partial credit for admission on the basis of diplomas or recommendations. Each state university admits on the diploma of the approved High Schools and college preparatory schools within its own territory and even extends the courtesy to schools approved by sister state universities.

Since the American Revolution a considerable number of the older colleges, such as Harvard, Yale, Columbia and Princeton have created new faculties and schools either by separating groups of studies formally incorporated in the regular college curriculum or by establishing new chairs and courses. Thus have the older colleges been transformed into universities with faculties of medicine, law, science, etc. The state universities, on the contrary, being for the most part of more recent origin, have not developed out of colleges, but were originally created as institutions comprising several faculties of wich the Arts college is only one, though usually playing the most important role. In proportion as the American universities have grown they have added to themselves new faculties and schools. In fact, a very marked tendency in American higher education is to incorporate within the university, as an integral element in its constitution, each nex intellectual interest, branch of research or group of studies, as soon as it fully makes good its claim to recognition, instead of creating for it a special school. This tendency is in marked contrast with the European practice, especially as exemplified in France. Thus the American university comprises not only the older faculties and schools of European universities, but also schools of commerce or business administration, of engineering, of mines, of architecture, of philantropy, of agriculture, conservatories of music, normal training schools, etc.

In most American universities, a very marked distinction exists between undergraduate or college studies and courses on the one hand, and graduate professional and technical work, on the other. The college embodies the spirit of general culture, of broad but not very sharply defined interests. A college education offers to many a student an opportunity to find himself, to discover his particular bent and the wide and varied range of subjects of study offered further this end. The graduate, professional and technical schools, on the contrary, presuppose the final choice of a profession on the part of the student and offer most rigidly required courses. All graduate schools, and a very large number of professional schools, require the completion of the college course as the prerequisite for enrollment in their courses. However, in the matter of the amount of completed college work required for admission to a professional or technical school, there is a great deal of variation in different universities.

The normal American college course comprises four years of study and leads in most colleges to the degree of Bachelor of Arts only. In some colleges, where a considerable number of courses in science is offered, he student, on completing satisfactorily the required work, receives either the degree of Bachelor of Science or Bachelor of Arts according to whether or not he has chosen more then half his courses in science. In some colleges [illegible] even with honors or special mention in a certain subject or group of subjects [illegible] the student's special interest and aptitudes. Some colleges also confer, along with the bachelor's degrees, a teacher's diploma, a recommendation or license to teach, to such students as have shown marked proficiency along certain lines of study and have completed successfully certain specified courses.

The graduate school, which offers advanced courses and opportunities for research alone the next step of study in the curriculum of the college usually confers only two degrees, those of Master of Arts (M. A.) and Doctor of philosophy (Ph. D.). The degree of Master of Arts usually represents one year of advanced study and research along some particular line. Some graduate schools require the preparation of a thesis, but practice

in this respect varies greatly. The degree is laid down by some graduate schools as the necessary prerequisite for enrollment for the Ph. D.

The degree of Doctor of Philosophy usually represents three years of distinctly research work after obtaining the degrees of Bachelar of Arts or Science. Most graduate schools require the candidate to pursue studies along one main line called the major study, and two other closely related lines, called the minor studies, such as history, political science, geography. A thesis is always required upon some theme comprised within the major study. This thesis must evidence not only consciencious, systematic research but also superior intellectual qualities, and must be a distinctly original and valuable contribution to the subject. It is increasingly rare for a teacher to be named titular professor who is not a Doctor of Philosophy.

American professional and technical schools are of so many different types, their courses of study are so varied and their requirements, both for admission and for degrees, are so diverse that any brief summary is impossible. In general it may be said that the best schools of law offer a largely prescribed course of three years leading to the degree of Bachelor of Laws. Sometimes a fourth year of supplementary graduate works is offered. The eight medical schools, recognised by the Carnegie Foundation as of the highest rank, offer a four year course leading to the degree of Doctor of Medicine. An extra year of service in a hospital is often required in fulfilment of the requirements for the degree. Both law and medical schools of higher grade require that the candidate for admission shall have obtained the degree of Bachelor of Arts or more often, Bachelor of Science, and that, during his undergraduate course, he shall have pursued successfully certain prescribed courses of study.

A majority of the larger institutions of higher education in the United States admit women to all their courses and laboratories on the same conditions as men. The group of older colleges founded before 1830, however, continue to admit men only. Some of the colleges which have developped into universities admit women to their graduate and professional schools, but have created an undergraduate college for women only in which the corps of teachers is drawn from the men's college. The first college exclusively for women, Randolph Macon College at Ashland, Virginia, was founded in 1830. Since that date a considerable number of women's colleges have been established of which the best known, in the order of their founding, are Mt. Holyoke, Vassar, Wells, Smith, Wellesley, Radcliffe, Bryn Mawr and Barnard. All the state universities, and nearly, all the endowed universities and schools of the Central and Western states are co-educational.

American institutions of higher education are maintained and supported in various ways. A very large number depend upon private gifts and endowments and the fees paid by students. This is true of nearly all the older colleges and the universities, like Harvard, Yale, Columbia and Princeton, which are the outgrowth of colleges. These endowments, which have often been amassed during long periods, and which represent hundreds of individual gifts, sometimes reach very considerable sums, such as the endowment of Harvard University which now amounts to more then 28,000,000 doll. The universities and technical schools, founded and maintained by the different states, are usually supported mostly by direct taxation of the property of the state. These direct taxes sometimes take the form of a fixed mill tax, sometimes the form of special appropriations from year to year. The revenue of state institutions is often augmented by students fees and, in some cases, by endowments and land grants made by the United States government to the several states for the purpose of promoting hihger education. A very few universities are supported almost entirely by ecclesiastical organizations.

ASSOCIATION OF AMERICAN UNIVERSITIES

The Ass. of Am. Univ. is founded for the purpose of considering matters of common interest relating to graduate study.

LES ÉMIGRÉS RUSSES EN FRANCE

CE QU'ILS SONT — CE QU'ILS FONT
CE QU'ILS PENSENT

PAR

Charles LEDRÉ

Voici un livre qui pour la première fois, présente les émigrés russes tels qu'ils sont avec leurs faiblesses, leurs rêves mystiques, mais aussi leur force prodigieuse et leur indéfectible espérance.

UNIVERSITÉS et GRANDES ÉCOLES

FRANCE et COLONIES

L'ENSEIGNEMENT EN FRANCE

Les jeunes gens français font leurs premières études dans les lycées ou collèges, d'où ils sortent à 17 ou 18 ans pourvus ordinairement du diplôme de bachelier.

Les examens de baccalauréat sont passés devant les Facultés de l'Etat. Pour la première partie, le candidat a le choix entre diverses séries d'épreuves. Admis à l'une de ces séries, le candidat peut se présenter un an plus tard soit à l'examen de philosophie, soit à celui de mathématiques.

S'il subit avec succès ces secondes épreuves, il est déclaré bachelier.

Il a alors le choix entre les Universités et les grandes Ecoles.

La Faculté de Droit lui ouvre les carrières de magistrat, avocat, notaire. La Faculté des Sciences, celle de professeur dans l'une des branches scientifiques, et de même la Faculté des Lettres pour le professorat littéraire.

Les ingénieurs fréquentent peu les Universités, mais il y a tendance à étendre les cours techniques qui existent actuellement en petit nombre dans les Facultés des Sciences. Ce sont les grandes Ecoles spéciales : Polytechnique, Centrale des Arts et Manufactures, etc., qui forment les ingénieurs. Elles recrutent leurs élèves au concours.

Les Ecoles de Commerce et d'Agriculture recrutent aussi leurs élèves au concours.

Les Lycées, Collèges et Institutions préparent au *Baccalauréat*, à titre onéreux. Aucune condition, autre que les conditions ordinaires de moralité, n'est exigée pour l'admission, pas plus des étudiants français que des étudiants étrangers.

Il existe en France un grand nombre d'Ecoles supérieures, indépendantes des Universités. Les conditions d'admission dans ces Ecoles sont variables. Ces conditions seront indiquées pour chaque Ecole, Université, ainsi que la durée des études, les diplômes décernés.

UNIVERSITÉS

DISPOSITIONS GÉNÉRALES

Immatriculation.

Si l'on vient chercher à l'Université un complément de culture, ou y poursuivre des recherches scientifiques, sans viser l'obtention d'un grade ou d'un titre d'Etat, il suffit, pour être considéré comme étudiant, d'être immatriculé, c'est-à-dire porté sur les registres d'une Faculté ou Ecole de l'Université.

L'immatriculation peut être demandée à n'importe quel moment et vaut pour toute l'année scolaire. Elle doit être renouvelée au début de chaque année scolaire.

Inscriptions.

Si on désire obtenir un grade ou un titre d'Etat, il ne suffit pas d'être immatriculé, il faut être inscrit comme poursuivant tel grade ou tel titre.

Pour chaque grade ou titre, un nombre de certificats d'études supérieures est exigé : la durée minima des études préalables à faire se trouve ainsi fixée par le nombre des inscriptions à prendre.

L'inscription entraîne de droit l'immatriculation. Dès que dans une Faculté ou Ecole on a pris une inscription et payé le droit afférent, on est d'office, immatriculé, sans avoir à payer le droit spécial d'immatriculation.

Dispositions communes à l'immatriculation et à l'inscription.

L'immatriculation et, *a fortiori*, l'inscription confèrent à l'étudiant le droit de suivre tous les enseignements, cours, conférences, exercices de la Faculté ou Ecole où il s'est fait immatriculer ou inscrire et d'utiliser les bibliothèques, musées, collections, etc. Toutefois, en ce qui concerne les laboratoires et travaux pratiques, l'admission de l'étudiant simplement immatriculé est subordonnée à l'agrément du Directeur du laboratoire et au paiement de droits spéciaux.

L'étudiant immatriculé ou inscrit peut se faire immatriculer dans une autre Faculté ou Ecole de l'Université et en suivre les enseignements, sans avoir à acquitter de nouveaux droits, sur la présentation d'un certificat constatant son immatriculation antérieure

Il n'en est pas de même dans les Instituts techniques créés par les Universités Les étudiants n'y ont accès qu'après paiement de droits spéciaux de travaux pratiques. Le fait d'être déjà immatriculés ou inscrits dans une Faculté ne les dispense pas de ce droit.

Titres conférés par les Universités en dehors des diplômes d'Etat.

Les Universités ont créé un certain nombre de diplômes, brevets et certificats universitaires, parmi lesquels nous citerons comme exemple le Doctorat d'Université.

Les Universités ont conféré ces titres aussi bien aux étudiants qui suivaient les études exigées ne correspond aucun grade ou titre d'Etat que faciliter aux étudiants étrangers l'acquisition de diplômes qui ont une valeur scientifique, mais qui ne donnent pas le droit d'exercer en France certaines professions.

Ces diplômes, brevets et certificats, étant des créations propres à chaque Université, les conditions de scolarité, les droits à acquitter varient d'une Université à l'autre alors même qu'ils portent la même dénomination. Il convient donc, pour avoir des précisions au sujet des titres universitaires, de se reporter à l'Annuaire de chaque Université, ou bien au livre publié par l'Office National des Universités, bien que nous donnions plus loin les renseignements indispensables.

Les Universités françaises comprennent les Facultés de Droit, Médecine, Sciences, Lettres, Pharmacie et deux Facultés de Théologie à Strasbourg. Il existe aussi des Facultés mixtes de Médecine et de Pharmacie et des Ecoles de plein exercice et préparatoires de Médecine et de Pharmacie.

Les Facultés appartiennent : (*a*) à l'Enseignement de l'Etat ; (*b*) à l'Enseignement libre. Les Facultés libres ont les mêmes fonctions que les Facultés de l'Etat : comme on sait, *les Facultés doivent contribuer au progrès de la science par les travaux de leurs professeurs, et dispenser cette science aux étudiants.* Les Facultés libres perçoivent les droits universitaires d'inscription, mais elles n'ont pas le droit de conférer les grades universitaires d'Etat, c'est-à-dire le Baccalauréat, la Licence et le Doctorat d'Etat : les étudiants qui en suivent les cours doivent subir les examens de Licence et de Doctorat de

vant les Facultés de l'Etat, avec les étudiants qui suivent les cours de ces dernières Facultés ; il n'est pas fait de distinction entre les uns et les autres.

Aux Facultés libres de Droit, Médecine et Pharmacie, Sciences, Lettres, il faut adjoindre les Facultés libres de Théologie, tant catholiques que protestantes, et les Ecoles (libres) dentaires.

Les cours supérieurs de certains Lycées, Collèges et Institutions équivalent à la première année [illegible] ; ces cours (*Mathématiques spéciales et Rhétorique supérieure*) sont indiqués dans l'Index.

Les diplômes décernés par les Universités françaises sont réputés dans le monde entier ; un grand nombre d'étudiants étrangers les recherchent.

Les cours des Universités françaises commencent au début de novembre et prennent fin au début de juillet. On compte deux semestres et quatre trimestres.

La possession du diplôme de bachelier est requise des étudiants demandant à être inscrits dans une Université, mais il existe de nombreux cas de *dispenses* et d'*équivalences*.

Dispenses de baccalauréat accordées aux étudiants français.

Ces dispenses sont fort nombreuses et ne peuvent être énumérées ici.

Equivalences de baccalauréat accordées : *a*) aux étudiants français ayant fait leurs études à l'étranger ; *b*) aux étudiants étrangers.

Ces *équivalences* sont accordées (*dans certains cas*) aux étudiants français ayant fait leurs études à l'étranger [illegible] et aux étudiants étrangers (à titre gratuit), *qui possèdent certains diplômes, titres ou certificats étrangers dont l'appréciation est laissée aux autorités compétentes.*

Formalités relatives aux demandes d'équivalence du baccalauréat de l'enseignement secondaire formulées par les étudiants de nationalité française ayant fait leurs études à l'étranger.

L'équivalence d'un diplôme, titre ou certificat étranger avec le baccalauréat français est prononcée par le Recteur de l'Académie dans le ressort de laquelle se trouve la Faculté ou Ecole où veut s'inscrire l'étudiant, ou par le Ministre de l'Instruction Publique

A la demande de l'étudiant devront être joints :

1° Un extrait de l'acte de naissance du postulant :

2° L'original et la traduction du diplôme, titre ou certificat pour lequel l'équivalence est demandée.

La traduction devra être certifiée authentique soit par un traducteur-juré de France, soit par un agent diplomatique ou consulaire de France en résidence dans le pays d'origine du diplôme, titre ou certificat ;

3° La déclaration d'un agent diplomatique ou consulaire de France, attestant qu'au moment de l'obtention par le postulant de ce diplôme, titre ou certificat, ses parents étaient établis depuis au moins cinq ans à l'étranger.

Chaque équivalence est prononcée par un arrêté du Recteur visant le diplôme, titre ou certificat étranger admis en équivalence. Copie de cet arrêté est transmise dans le délai de quinze jours au Ministre de l'Instruction publique.

Sur production de diplômes, titres ou certificats étrangers autres que ceux régulièrement reconnus, des équivalences de baccalauréat peuvent encore être accordées par le Ministre de l'Instruction publique, et pour les mêmes fins, *aux étudiants de nationalité française* ayant dû faire leurs études secondaires à l'étranger.

Formalités relatives aux demandes d'équivalence du baccalauréat de l'enseignement secondaire formulées par les étudiants étrangers.

Les étudiants de nationalité étrangère peuvent se faire inscrire dans les Universités françaises, après avoir obtenu l'équivalence avec le baccalauréat français de l'enseigne-

ment secondaire, des diplômes, titres ou certificats qui, dans leur pays d'origine, donnent accès aux études d'enseignement supérieur.

L'équivalence du baccalauréat est prononcée par le Recteur de l'Académie dans le ressort de laquelle se trouve la Faculté où veut s'inscrire l'étudiant, ou par le Ministre.

L'étudiant dépose au Secrétariat de la Faculté où il désire se faire inscrire, les pièces suivantes :

1° Une demande d'équivalence en indiquant quelles études il désire faire ;

2° Son diplôme, titre ou certificat étranger pour lequel est demandée l'équivalence ;

3° Une pièce d'identité (acte de naissance, acte de baptême, etc.).

Ces documents devront avoir été visés soit par un agent diplomatique ou consulaire de France en résidence dans le pays d'où ils proviennent, soit par un représentant de ce pays accrédité en France. Aux originaux devront être jointes des traductions authentiques et certifiées telles, faites soit par un traducteur-juré de France, soit par un des agents diplomatiques ou consulaires dont le visa est requis.

Examen spécial pour les étudiants étrangers.

Il existe un examen institué spécialement pour les étudiants de nationalité étrangère originaires de pays où l'enseignement secondaire n'est pas organisé de façon équivalente à l'enseignement secondaire français, et qui demandent à s'inscrire dans les Facultés ou Ecoles d'enseignement supérieur. Cet examen a lieu chaque année en deux sessions : l'une dans la seconde quinzaine de mars, l'autre dans la première quinzaine de novembre. Le registre d'inscription est clos 20 jours avant la date d'ouverture de la session. Le programme *de l'examen peut être demandé au Bureau des Renseignements de l'Université de Paris.*

Titres universitaires étrangers permettant de postuler le doctorat en droit ès sciences ou ès lettres.

Ces titres sont multiples et ne peuvent être énumérés ici.

FACULTÉS DE THÉOLOGIE

Les diplômes, les conditions d'admission, la durée et les frais des études sont variables avec les Facultés.

FACULTÉS DE DROIT

I. — Diplômes.

A. *Diplômes d'Etat.* — I. Licence en droit. — II. Doctorat en droit (*a.* Doctorat ès sciences juridiques ; *b.* Doctorat ès sciences politiques et économiques). — III. Certificat de capacité

B. Il existe de nombreux *diplômes d'universités*, spéciaux à telle ou telle université, qui ne peuvent être énumérés ici.

2 *a.* — Conditions d'inscription des étudiants français.

Licence en droit. — La production du diplôme de bachelier est obligatoire. La *dispense* du baccalauréat est cependant accordée aux étudiants pourvus de certains titres, diplômes ou certificats.

Doctorat en droit. — La production du diplôme de licencié en droit est obligatoire.

Certificat de capacité. — Aucun diplôme n'est exigé pour s'inscrire.

Certificat de science pénale. — Le grade de bachelier en droit ou le certificat de capacité en droit est exigé. A défaut, un examen du candidat a lieu.

Certificat d'études administratives et financières. — Les conditions d'inscription sont les mêmes que pour la licence, mais le certificat de capacité est admis comme suffisant ; le Doyen peut accorder des dispenses, il les accorde en principe à tous les étudiants en droit.

2 *b*. — Conditions d'inscription des étudiants français ayant fait leurs études à l'étranger.

Ces conditions sont les mêmes que ci-dessus ; il y a lieu d'ajouter les *équivalences* du baccalauréat. L'équivalence du baccalauréat n'est accordée à titre onéreux.

2 *c*. — Conditions d'inscription des étudiants étrangers.

Licence en droit. Doctorat en droit d'Etat. — Mêmes conditions que pour les étudiants français ayant fait leurs études à l'étranger. L'équivalence du baccalauréat est accordée sans que le gouvernement les droits d'examen de ce baccalauréat soit exigé. L'équivalence de la licence en droit en vue de l'obtention du grade de Docteur en droit s'obtient en produisant en original les diplômes, brevets ou certificats délivrés par les Universités où les études ont été poursuivies.

Ces équivalences peuvent également être accordées en vertu de décisions de principe.

Certificat de capacité. — Aucun diplôme n'est exigé.

Doctorat d'Université. — Même faculté est accordée aux licenciés en droit : elle l'est aussi aux étudiants pourvus de titres français ou étrangers que la Faculté jugera équivalents à la licence en droit.

Certificat de science pénale. — Diplôme d'une Faculté de droit étrangère ; à défaut : examen.

Certificat d'études administratives et financières. — Mêmes conditions que pour les étudiants français ; le Doyen peut aussi autoriser les étrangers, sous certaines conditions.

3. — Durée des études.

Licence en droit : trois années.

Doctorat en droit d'Etat : une année. Les étrangers déjà gradués d'une Université étrangère peuvent obtenir une dispense de scolarité.

Certificat de capacité : deux ans.

Doctorat en droit (d'Université) : une année.

Certificat de science pénale : deux semestres.

Certificat d'études administratives et financières : deux ans ; réduction d'un an pour les étudiants bacheliers en droit et pour les étudiants étrangers titulaires d'un diplôme d'une Université ou d'une Ecole supérieure étrangère.

5. — Examens de Doctorats en droit d'Etat et d'Université.

Les épreuves consistent : *a*) en deux examens oraux et *b*) en la soutenance d'une thèse.

FACULTÉS DE MÉDECINE

1. — Diplômes.

A. *Diplômes d'Etat.* — I. Doctorat en médecine. — II. Diplôme de chirurgien-dentiste. — III. Diplôme de sage-femme.

B. Il existe de nombreux *diplômes d'Universités*, spéciaux à telle ou telle université.

2 *a*. — Conditions d'inscription des étudiants français.

Doctorat en médecine. — La production du diplôme de baccalauréat est *obligatoire* : *aucune dispense n'est accordée* ; la production d'un certificat d'études physiques, chimiques et naturelles (P. C. N.) ou (S. P. C. N.) délivré par une Faculté des sciences est *obligatoire* aussi.

Diplôme de chirurgien-dentiste. — L'un des diplômes suivants est requis : baccalauréat,

brevet supérieur de l'enseignement primaire, certificat d'études primaires supérieures, diplôme de fin d'études de l'enseignement secondaire des jeunes filles.

Diplôme de sage-femme : le brevet de capacité élémentaire.

Diplôme de médecin colonial, Diplôme de chirurgien-dentiste : l'inscription est admise pour les docteurs en médecine, ainsi qu'aux étudiants en médecine pourvus de 16 inscriptions, ce qui correspond normalement à 4 années d'études dans une Faculté de médecine.

2 *b.* — Condition d'inscription des étudiants étrangers.

Pour les diplômes indiqués à l'article 2 *a*, les conditions exigées des étudiants étrangers sont identiques aux conditions exigées des étudiants français. Toutefois : 1° l'inscription est accordée aux étudiants roumains et aux étudiants originaires de l'Ile Maurice, pourvus du diplôme d'études secondaires de leur pays, il n'est pas nécessaire que ces étudiants aient le baccalauréat français ; 2° les étudiants pourvus d'un diplôme étranger de docteur en médecine sont admis à l'inscription pour les études conduisant aux diplômes de *médecin colonial* et de *médecin légiste*.

Doctorat en médecine d'Université : ce diplôme ne confère pas le droit d'exercer la médecine en France. Il est délivré *exclusivement* aux étrangers qui ont obtenu l'autorisation de faire leurs études et de subir leurs examens dans une Faculté de médecine sans être pourvus du baccalauréat français, à la faveur d'une *équivalence de baccalauréat* (voir p. F 3). Ces étudiants doivent : 1° justifier de l'équivalence du baccalauréat ; 2° du certificat d'études physiques, chimiques et naturelles (P. C. N.) délivré par une Faculté des sciences.

Les étrangers qui justifient de certificats d'études et d'examens délivrés par les Facultés de Médecine des Universités de leur pays pour qui peuvent obtenir du Ministre de l'I. P. une équivalence de scolarité, qui entraîne de dispenses d'inscriptions, qui se traduit par la concession d'un certain nombre d'inscriptions valant chacune une année de la durée des études médicales faites dans leur pays.

La dispense des examens probatoires correspondant aux inscriptions concédées n'est jamais accordée. Les médecins étrangers pourvus d'un diplôme d'docteur en médecine qui postulent le grade de Docteur de l'Université peuvent obtenir dispense partielle ou totale des inscriptions et dispense partielle des examens exigés pour ce grade.

3. — Durée des études.

Doctorat en médecine (*d'Etat*) et *Doctorat en médecine d'Université* : cinq ans ; une réduction peut être accordée *pour le seul doctorat d'Université* aux étrangers justifiant de certificats d'études, d'examens, de diplômes délivrés par les Facultés de médecine des Universités de leurs pays.

Diplôme de chirurgien-dentiste : deux années de stage, trois années de scolarité. Une dispense partielle de scolarité peut être accordée aux étrangers pourvus des diplômes mentionnés à l'art. 2 *a*.

Diplôme de sage-femme : deux ans. – *Diplôme de médecin colonial* : trois mois. — *Diplôme de médecin légiste* : deux semestres.

4. — Examens de Doctorats en médecine, d'État et d'Université.

Les examens sont : *a*, ceux de fin d'année ; *b*, ceux de clinique ; *c*, la soutenance d'une thèse.

FACULTÉ DES SCIENCES

1. — Diplômes.

A. *Diplômes d'Etat.* — I. Certificats d'études supérieures de sciences. — II. Licence ès sciences. — III. Diplômes d'études supérieures de sciences. — IV. Doctorat ès sciences (*a*, Sciences mathématiques ; *b*, Sciences physiques ; *c*, Sciences naturelles). — V. Certificat d'études physiques, chimiques et naturelles (P. C. N.).

B. *Diplômes d'Université.* — I. Doctorat d'Université. — II. Diplôme d'Ingénieurs (variables avec les Facultés).

2 *a*. — Conditions d'inscription des étudiants français.

Certificat d'études supérieures de sciences. — La production du diplôme de bachelier est obligatoire. La dispense du baccalauréat est cependant accordée en vue de la licence aux étudiants présentant certains titres, diplômes ou certificats (sous condition de verser les droits afférents au baccalauréat) :

Diplômes d'études supérieures de sciences. — Aucune condition n'est requise.

Doctorat ès sciences (d'Etat). — Il faut justifier (sauf dispense accordée par le Conseil de l'Université) du diplôme de licence ès sciences. Toutefois les docteurs en médecine et les pharmaciens de 1re classe aspirant au diplôme de docteur ès sciences physiques et naturelles sont admis à subir les épreuves sans produire le diplôme de licencié ès sciences sous réserve de justifier : 1° *pour les Sciences physiques*, du certificat d'études supérieures de Physique générale et du certificat d'études supérieures de Chimie générale ; 2° pour *les Sciences naturelles*, de deux des certificats d'études supérieures des sciences ci-après (à leur choix) : Zoologie (ou Physiologie), Botanique, Géologie (ou Minéralogie). Dans ce cas, les candidats doivent acquitter tous les droits afférents au grade, aux travaux pratiques et à l'examen dont ils sont dispensés.

Certificat d'études physiques, chimiques et naturelles (P. C. N.). — Diplôme de bachelier nécessaire si l'on veut entreprendre des études de médecine ou bien : brevet supérieur ou certificat d'études primaires supérieures, diplôme de fin d'études de l'enseignement secondaire des jeunes filles.

Doctorat d'Université. — Ce titre est d'ordre purement scientifique et ne confère aux titulaires aucun droit aux fonctions ou à l'exercice des professions pour lesquelles sont requis les grades d'Etat. Aucun grade n'est expressément exigé. Les candidats doivent produire, avec leur *curriculum vitæ*, leurs titres et leurs diplômes et la liste de leurs travaux scientifiques dont la Faculté apprécie la valeur.

Diplômes d'Ingénieurs. — En règle générale les étudiants ne sont admis à suivre les cours qu'après examen.

2 *b*. — Conditions d'inscription des étudiants français ayant fait leurs études à l'étranger, et des étudiants étrangers.

Ces conditions sont les mêmes qu'à l'article 2 *a*, sauf que le diplôme de bachelier, quand il est exigé, peut être remplacé par une des équivalences énumérées précédemment (il y a lieu, pour les étudiants français seuls, d'acquitter les droits afférents au baccalauréat).

3. — Durée des études. Renseignements divers.

Certificat d'études supérieures de sciences. — Ces certificats diffèrent suivant les Facultés. Ils sont énumérés à propos de chaque Faculté (1). La préparation à un certificat déterminé exige une année de scolarité. Au point de vue pratique, il est d'usage de préparer deux certificats la même année. Certains étudiants, ayant déjà fait des études supérieures, peuvent exceptionnellement préparer trois certificats en un an.

Licence ès sciences. — Le diplôme de licencié ès sciences est conféré à tout étudiant qui justifie de trois certificats d'études supérieures. Les aspirants aux fonctions de l'enseignement secondaire pour lequel est requis le grade de licencié ès sciences (licence d'enseignement) et les candidats au doctorat d'Etat sont tenus de justifier d'un diplôme de licencié portant un des trois groupes de mentions suivantes :

1° Calcul différentiel et intégral ; Mécanique rationnelle ; Physique générale *ou bien* un troisième certificat de l'ordre des Sciences mathématiques (le certificat de Mathématiques générales préparatoires à l'étude des Sciences physiques, dit Mathématiques générales, étant exclu) ;

2° Physique générale. Chimie générale, troisième certificat au choix ;

3° Zoologie ou Physiologie, Botanique, troisième certificat au choix.

Les aspirants aux fonctions de l'enseignement scientifique dans les lycées et collèges de

1. *Voir* les Facultés des Sciences de *Paris*, *Besançon*, etc.

jeunes filles doivent, à défaut du certificat d'aptitude à l'enseignement secondaire des jeunes filles (ordre des sciences), justifier d'un diplôme de licencié ès sciences comprenant : le certificat d'études supérieures de sciences portant sur la Physique, la Chimie et l'Histoire naturelle (S. P. C. N.), le certificat de Mathématiques générales et un troisième certificat au choix de l'aspirant.

Diplômes d'études supérieures de sciences : aucune durée d'études n'est spécifiée ; cependant si l'enseignement correspondant comporte des travaux de laboratoire, deux semestres de séjour au laboratoire sont exigés.

Doctorat ès sciences d'Etat : aucune durée d'études n'est spécifiée.

Certificat d'études physiques, chimiques et naturelles (P. C. N.) : un an.

Doctorat d'Université : comme pour le doctorat d'Etat.

Diplômes d'ingénieurs : deux ou trois années.

I. Examens de Doctorat ès Sciences d'Etat et d'Université

Les épreuves consistent en la soutenance de deux thèses renfermant des résultats nouveaux, *ou bien* d'une thèse renfermant des résultats nouveaux et une discussion de propositions désignées par la Faculté des sciences.

La principale thèse est *obligatoirement* un travail de valeur. Les diplômes de docteur ès sciences ne sont accordés que très difficilement et après trois ans de recherches au moins, souvent cinq ans et plus. Aucune comparaison ne peut être faite avec les diplômes de doctorat étrangers.

FACULTÉS DES LETTRES

1. — Diplômes.

A. *Diplômes d'Etat. — Certificats d'études supérieures de Lettres. — Licence ès lettres. — Diplômes d'études supérieures de lettres. — Doctorat ès lettres. — Licence ès lettres* : Le diplôme de licencié ès lettres est délivré aux candidats qui justifient : 1° D'un diplôme de bachelier ou d'une dispense, ou d'une équivalence de ce diplôme ; 2° de quatre inscriptions semestrielles ; 3° de quatre certificats d'études supérieures délivrés dans les conditions indiquées ci-dessous et choisis dans la liste des certificats délivrés par la Faculté.

Le diplôme est délivré en même temps que le quatrième certificat. La licence ès lettres est donc obtenue à la suite d'une scolarité normale de deux années, divisées en quatre semestres, donnant lieu à quatre inscriptions. Deux semestres peuvent être passés soit dans d'autres universités françaises, soit dans des universités étrangères. Toutefois le dernier certificat doit être obtenu dans une faculté française des Lettres. Il y a deux sortes de licences : l'une générale ou libre, l'autre dite d'enseignement, professionnelle et particulière aux candidats qui se destinent au professorat de l'enseignement secondaire. La licence ès lettres générale ou libre se compose de quatre certificats choisis dans la liste publiée par la Faculté des Lettres de chaque Université. Toutefois, tout candidat au diplôme de licencié ès lettres devra subir une épreuve de langue étrangère vivante à son choix sur une liste établie par la Faculté, à moins qu'un des certificats obtenus ne porte sur une langue étrangère vivante. La licence ès lettres d'enseignement (Décret du 20 septembre 1920) comprendra obligatoirement un des quatre groupes de certificats ci-après :

1° *Philosophie.* — A) Histoire générale de la philosophie. — B) Psychologie. — C) Logique et philosophie générale. — D) Morale et sociologie.

2° *Lettres.* — A) Etudes grecques. — B) Etudes latines. — C) Littérature française. — D) Grammaire et philologie.

3° *Histoire.* — A) Histoire ancienne. — B) Histoire du moyen âge. — C) Histoire moderne et contemporaine. — D) Géographie.

4° *Langues vivantes.* — A) Etudes littéraires classiques. — B) Littérature étrangère. — C) Philologie. — D) Etudes pratiques.

Les langues vivantes à choisir sont : allemand, anglais, espagnol, italien ou russe.

B. Il existe de nombreux *diplômes d'universités* décernés par telle et telle université.

2 *a*. — Conditions d'inscription des étudiants français ayant fait leurs études en France.

Certificats d'Etudes supérieures et Licence. — Les candidats à un, deux ou trois certificats d'études supérieures n'ont pas à justifier de la possession du baccalauréat. Aucun diplôme n'est exigé pour s'inscrire aux trois premiers certificats. Pour le P. certificat seul, on dispense du diplôme correspondant, le baccalauréat est exigé. *La dispense* de baccalauréat est réservée aux candidats qui possèdent certains titres, diplômes ou certificats (sous condition de verser les droits afférents au baccalauréat).

Doctorat ès lettres (d'Etat). — Il faut justifier du diplôme de licencié ès lettres.

Doctorat d'Université (mention *Lettres*). — Le candidat doit justifier du diplôme de licencié ès lettres ou de titres et diplômes reconnus équivalents par la Faculté.

2 *b*. — Conditions d'inscription des étudiants français ayant fait leurs études à l'étranger.

Mêmes conditions que ci-dessus, sauf que l'équivalence du baccalauréat est aussi acceptée, à charge de verser les droits afférents au baccalauréat aux étudiants présentant certains diplômes.

2 *c*. — Conditions d'inscription des étudiants étrangers.

Ces conditions sont les mêmes que celles énumérées à l'article 2 *b*, mais le versement des droits relatifs au baccalauréat n'est pas exigé.

3. — Durée des études.

Licence ès lettres : ordinairement deux ans.

Doctorat ès lettres (d'Etat) : aucune condition de durée n'est fixée.

Doctorat d'Université : deux années : une dispense partielle peut être accordée.

4. — Examens de Doctorats ès Lettres d'Etat et d'Université.

a) *Doctorat d'Etat.* — Deux thèses sont exigées :

La première est rédigée en français. La seconde, qui peut être un Mémoire ou un travail critique, doit être rédigée soit en français, soit dans une des langues anciennes ou modernes enseignées à la Faculté. Elle doit être, autant que possible, une contribution érudite : bibliographie ou catalogue critique, édition d'un texte inédit ou peu connu, mise au point d'un problème mal ou mal publié, recherche ou commentaire sur un document, etc.

b) *Doctorat d'Université.* — Les épreuves comprennent la soutenance d'une thèse imprimée écrite en français ou en latin et deux interrogations agréées par la Faculté, choisies par le candidat dans les matières enseignées à la Faculté.

La principale thèse, aussi bien du Doctorat d'Université que du Doctorat d'Etat est *essentiellement* un travail de valeur. Les diplômes de docteurs ès lettres ne sont accordés que très difficilement, et après cinq ans de recherches au moins, souvent plus. Aucune comparaison ne peut être faite avec les diplômes de doctorat étrangers.

FACULTÉS ET ÉCOLES SUPÉRIEURES DE PHARMACIE

1. — Diplômes.

A. *Diplômes d'Etat.* — I. Diplôme de pharmacien. — II. Diplôme supérieur de pharmacien. — III. Certificat d'aptitude à la profession d'herboriste.

B. Il existe de nombreux *diplômes d'Universités* spéciaux à telle et telle université : I. Diplôme de pharmacien universitaire (Universités de Paris Bordeaux, Nancy). — II. Diplôme de docteur d'Université (mention *Pharmacies*) (Universités de Paris, Alger, Bordeaux, Lille Lyon, Montpellier, Nancy, Toulouse). — III. Diplômes d'études de Pharmacien de 1re classe, (Université de Lyon). — IV. Diplôme supérieur d'études de Pharmacien de 1re classe (Uni

versité de Lyon). – V. Diplôme d'études pharmaceutiques coloniales (Université d'Aix-Marseille).

2. — Conditions d'inscription.

Diplôme de pharmacien : L'étudiant français ou étranger doit présenter un diplôme de bachelier et un certificat de réception à l'examen de validation de stage.

Diplôme supérieur de pharmacien : Le diplôme supérieur de pharmacien est délivré, à la suite de la soutenance d'une thèse, aux pharmaciens licenciés ès sciences physiques ou ès sciences naturelles, ou qui, à défaut de l'une de ces licences, pourront attester : 1° qu'ils ont accompli une année supplémentaire d'études dans une Faculté ; 2° qu'ils ont, à l'issue de cette année, subi avec succès un examen comprenant les matières des licences ès sciences physiques et naturelles appliquées à la pharmacie.

Certificat d'aptitude à la profession d'herboriste : [illegible] prévu par l'arrêté du 1er août 1879, [illegible]

Diplôme de pharmacien universitaire : Réservé aux étrangers qui, non pourvus du diplôme de bachelier, ne peuvent aspirer au diplôme de pharmacien d'État, aux aspirants à ce diplôme devront, en vue de l'inscription réglementaire, justifier des études accomplies et des grades obtenus par eux à l'étranger. Ils devront, à cet effet, produire leurs certificats et diplômes correspondants, accompagnés, pour chacun de ces titres, d'une traduction en français faite par un traducteur juré, ou visé par le ministre de leur nation à Paris.

Sur le vu de ces titres, il pourra leur être accordé, à titre d'équivalence, soit la dispense des grades français exigés pour l'inscription, soit l'équivalence des stages obtenus par eux à l'étranger, ainsi que les dispenses partielles de scolarité correspondant à la durée des études faites par eux à l'étranger.

Doctorat d'Université : Ce diplôme peut être postulé soit par les étudiants français, soit par les étudiants étrangers. Le candidat français doit justifier du diplôme de pharmacien. Le candidat étranger doit présenter des attestations d'études, diplômes, titres scientifiques obtenus à l'étranger et en France et relatifs : 1° à la physique, à la chimie et à la toxicologie ; 2° à la pharmacie galénique et à la matière médicale.

3. — Durée des études.

Diplôme de pharmacien : une année de stage officinal dans une pharmacie et quatre années de scolarité.

Diplôme supérieur de pharmacien : indéterminée.

Certificat d'aptitude à la profession d'herboriste : la durée des études est indéterminée, la moyenne est d'une année au moins.

Pharmacien universitaire : une année de stage officinal et quatre années de scolarité.

Doctorat d'Université : une année au moins.

4. — Epreuves de Doctorat.

L'épreuve consiste dans la soutenance d'une thèse attestant des recherches personnelles.

AGRÉGATION. — GRADES UNIVERSITAIRES

L'agrégation s'obtient au concours. Elle est réservée aux seuls étudiants français, agréés préalablement au concours, présentant certains diplômes déterminés.

L'agrégation de l'Enseignement secondaire (Sciences *ou* Lettres) donne droit à une chaire dans un lycée.

L'agrégation de Droit donne droit à une chaire dans une Faculté de Droit.

L'agrégation de Médecine ne donne pas droit à une chaire dans une Faculté de Médecine ; mais nul ne peut enseigner dans une Faculté de Médecine s'il n'est agrégé de Médecine.

Il n'existe pas d'agrégation des Facultés des Sciences, ni des Facultés des Lettres. Les professeurs de ces Facultés sont choisis parmi les docteurs ès sciences (d'Etat) et les

docteurs ès lettres (d'Etat) ; un grand nombre de ceux-ci sont agrégés de l'Enseignement secondaire, mais aucune obligation n'existe à ce sujet.

Aucune des agrégations n'est un grade.

La dénomination de grade est réservée aux Baccalauréats, Licences et Doctorats.

Il n'est jamais délivré de diplômes par les facultés, mais il peut être délivré des actes en tenant lieu.

COLLÈGE DE FRANCE. ÉCOLE POLYTECHNIQUE. ÉCOLE NORMALE SUPÉRIEURE. ÉCOLE CENTRALE DES ARTS ET MANUFACTURES

En dehors des Universités, quatre grandes Ecoles, que nous placerons suivant l'ordre de leur ancienneté, tiennent un rang à part, non seulement en France, mais encore dans le monde entier. Ce sont : le *Collège de France*, l'*Ecole Polytechnique*, l'*Ecole Normale supérieure*, l'*Ecole Centrale des Arts et Manufactures*.

Créé en 1520 par François Ier, le *Collège de France*, garde, parmi les établissements d'enseignement supérieur, une physionomie particulière. Sa fonction propre est de contribuer au progrès de la science par des travaux et des recherches, par des enseignements relatifs à ces travaux et ces recherches, sans préoccupation de préparer à des grades ou à des diplômes, et enfin par des missions et des publications.

L'*Ecole Polytechnique*, dont les élèves sont recrutés par un concours des plus difficiles, est une pépinière de savants. Les 20 premiers élèves environ de chaque promotion, celles-ci comptant de 150 à 200 élèves, sont appelés à être des ingénieurs de l'Etat. Sa réputation n'est égalée que par celle de l'Ecole Normale, de fondation plus récente, dont le but est exclusivement de former des professeurs, dans l'ordre des lettres et dans celui des sciences.

Le concours de l'*Ecole Normale supérieure* (Section des Lettres) est réservé à l'élite de la jeunesse littéraire française ; la section des Sciences se partage, avec l'Ecole Polytechnique, les sujets les plus brillants de l'ordre des sciences.

La plupart des candidats classés dans les premiers rangs pour l'Ecole Polytechnique se trouvent dans les 15 à 20 élèves admis chaque année à l'Ecole Normale (Sciences).

Le nombre des savants français, anciens élèves de l'Ecole Normale, est très élevé.

L'*Ecole Centrale des Arts et Manufactures* reçoit chaque année, au concours, environ 250 élèves, tant français qu'étrangers, et, en fait, des ingénieurs techniciens dont la valeur est universellement reconnue.

ÉCOLES SPÉCIALES, GRANDS LYCÉES ET GRANDS COLLÈGES

Enfin, comme on le verra, il existe en France de nombreuses *Ecoles spéciales*, auxquelles nous avons adjoint les classes supérieures des grands *Lycées* et *Collèges*.

PARIS

Université de Paris (1929).

Académie de Paris, rue des Ecoles. Téléph. de l'Acad. Gobelins-12.80.

L'Université de Paris est, avec celle de Bologne, la plus ancienne du monde.
Dès le milieu du XII[e] siècle, en effet, les écoles parisiennes étaient nombreuses et la renommée [illegible]

1. L'*Académie* est une division territoriale composée de plusieurs départements, placée sous l'autorité du Recteur et comprenant tous les établissements d'Enseignement supérieur, secondaire et primaire.
Les *Universités* sont des réunion de Facultés et Écoles d'Enseignement supérieur de l'État ; les Universités sont des personnes morales, ayant le pouvoir d'acquérir et de posséder des biens.

peaux, attirait à elles les étudiants de tous les pays. On y enseignait les sciences alors connues et, tout d'abord, les arts libéraux constituant le *trivium* et le *quadrivium*, puis des sciences plus spéciales, la Médecine, le Droit civil, le Droit canonique et la Théologie. Les écoles étaient placées sous l'autorité directe de l'évêque de Paris, qui délivrait la *licentia docendi* sans laquelle on ne pouvait enseigner et conservait, tant sur l'enseignement que sur la discipline, un droit permanent de surveillance.

En 1200, à l'occasion d'une rixe survenue entre étudiants et bourgeois, une charte de Philippe-Auguste enleva l'Université la juridiction civile pour la soumettre aux seuls juges d'Eglise. Un peu plus tard, en 1215, une bulle papale, la constituant comme corporation ecclésiastique, lui reconnaît le droit de réunion et de coalition, celui aussi de posséder un sceau et la place sous l'autorité directe du Saint-Siège.

Nombre d'étudiants en juillet 1927 : Droit, 3.860 ; Médecine, 5.189 ; Sciences, 3.996 ; Lettres, 6.329 ; Pharmacie, 1.322. *Total*, 26.108.

Mécanique appliquée, Hydraulique générale : G. Mouret.

Procédés généraux de construction : W. Watier.

Routes et voies ferrées sur chaussées: P. Le Gavrian.

Topométrie : M. d'Ocagne.

Chemins de fer : W. Martinet, M. Lacoin.

Electricité appliquée : A. Blondel, F. Guillebot de Nerville.

Minéralogie et géologie : L. de Launay, W. Jadot, préparateur.

Architecture : A. Bruel.

Droit administratif : **W. Delfau, W. Blondeau.**
Matériaux de constructions, Construction en béton armé : **A. Mesnager.**
Ponts métalliques : **B. Godard.**
Ponts et maçonnerie : **P. Séjourné. A. Aurie,** professeur adjoint.
Travaux maritimes : **Ch. Laroche.**
Navigation intérieure : **P. Vidal**
Machines à vapeur et autres moteurs thermiques : **M. Roy.**
Hydraulique appliquée : **Ch. Eydoux.**
Economie politique et finances : **C. Colson.**

Première année.

Analyse et mécanique : **W. Platrier.**
Répétitions d'analyse et de mécanique : Lt.-col. : **E. Barré.**
Architecture et technologie : **A. Bruel.**
Géométrie appliquée : **M. d'Ocagne.** Répétiteur : **M. Emanaud.**
Physique : **H. Ourson.**
Chimie : **R. Dubrisay.**
Economie sociale : **W. Divisia.**
Langues vivantes : *allemand* : **L. Grandegorge** ; *anglais* : **W. d'Haugest.**

A l'école sont annexés : Le laboratoire d'essais et de recherches statistiques, dirigé par **C. Le Gavriau,** le service des Cartes et Plans et le Dépôt des Instruments de précision dirigés le 1er par **M. Grelot,** le 2e par **W. Guillot.**

PARIS

Ecole Nationale supérieure des Beaux-Arts (1929).

14, rue Bonaparte, Paris (6e).

Admission d'élèves français et *étrangers*. Certificat d'études.

Directeur : **A. Besnard.** — *Sous-Directeur* : **G. Bomier.**

Secrétaire : **E. Guérin.**

Nombre d'élèves (1928-1929) : 245 Peintres, Sculpteurs : 130 ; Architectes : 1.350.

Budget (1929) : 2.105.000 francs.

Professeurs :

Chefs d'ateliers.

Peinture : **P. Laurens, N..., E. Laurent. L. Simon, N..., N..., N...**
Sculpture : **N..., N..., J. Boucher, F. Sicard, H. Patey, A. Carli.**
Architecture : **E. Pontrémoli, P. André. P. Bigot.**
Peinture à fresque : **N...**

Cours de sciences.

Statique et résistance des matériaux : **P. Montel.**
Stéréotomie : **R. Brandon.**
Géométrie descriptive : **E. Cartan.**
Perspective : **P. Guadet.**
Construction : **E. Arnaud.**
Anatomie : **H. Meige.**
Physique et chimie : **E. Bloch.**
Législation du bâtiment : **P. Coutant.**

Théorie de l'architecture : **L. Madeline.**

Cours d'Histoire.

Histoire et archéologie : **V. Chapot.**
Esthétique et histoire de l'art : **L. Hourticq.**
Histoire générale : **M. Pierre-Marcel.**
Histoire générale de l'architecture : **L. Hautecœur.**
Littérature : **P. Gautier.**

Cours de Dessin et Sculpture.

Peintres : **E. Friant, N..., N...**
Sculpteurs : **N..., H. Lombard, N...**

Cours de l'Enseignement simultané des trois Arts.

Dessin de figure : **A. Leroux.**
Modelage : **P. Gasq.**

PARIS

Ecole Normale supérieure (1929).

45, rue d'Ulm, Paris (5e). Téléph. Gobelins 06.45.

Fondée en 1795.

Recrutement au concours, les premiers de la liste entrant à l'Ecole Normale, les suivants étant *boursiers de licence* dans les Universités des départements.

Les candidats se préparent à ce concours, pour la section des Lettres, dans les classes de première supérieure de certains lycées, en travaillant sur des programmes qui sont ceux des classes supérieures de lettres ; pour la section des sciences, dans les classes de mathématiques spéciales, en travaillant sur des programmes identiques à ceux de l'Ecole Polytechnique, ou dans les Facultés des Sciences, en suivant les cours de Mathématiques générales et l'enseignement du P. C. N. L'Ecole admet en moyenne, chaque année, 30 élèves dans la section des Lettres et 20 dans celle des Sciences.

Le rôle actuel de l'Ecole Normale supérieure consiste à fournir des professeurs de l'enseignement secondaire, et à maintenir par cette qualité de la formation qu'elle donne à ses élèves, le niveau élevé des agrégations ; à favoriser le goût de la recherche scientifique personnelle, qui conduit à l'enseignement supérieur une partie de ses élèves, et constituer un milieu d'élite où, sous un régime de liberté très large, vivent en commun des étudiants qui se destinent aux études et aux enseignements les plus divers. Elle n'a, à cet égard, d'équivalent dans aucun autre pays du monde.

Fondée en 1795 (an III), rétablie en 1808, puis en 1826.

Nombre d'étudiants : 176.

Budget : 1.164.700 francs.

PARIS

Ecole professionnelle supérieure des Postes et Télégraphes (1929).

20, rue Las-Cases, Paris (7e).

I. La 1re section (des rédacteurs élèves) est une école de perfectionnement pour le personnel supérieur de l'administration des Postes et Télégraphes.
II. La 2e section (des élèves-ingénieurs) assure le recrutement des ingénieurs des Postes et Télégraphes.

La durée des études, pour les élèves de chacune des deux sections est de deux ans.
Les rédacteurs élèves sont recrutés au moyen d'un concours ouvert aux seuls agents des Postes et Télégraphes.
Les élèves ingénieurs sont recrutés : 1° parmi les élèves de l'Ecole Polytechnique classés, d'après leur numéro de sortie, dans le service des Postes et Télégraphes ; 2° parmi les candidats, appartenant ou non à l'administration, ayant subi avec succès les épreuves d'un concours qui a lieu tous les deux ans.
L'Ecole reçoit des auditeurs libres, français et étrangers.

Muséum national d'Histoire naturelle (1929).

57, rue Cuvier, Paris (5e). Téléph. Gobelins-08.39.

Cours publics.

Directeur : **L. Mangin.** — *Secrétaire* : **A. Moine.**

Surveillant général : **J. Peyrelongue.** — *Bibliothécaire* : **L. Bultingaire.**

A son origine, l'Etablissement qui devait devenir le Muséum national d'Histoire naturelle portait simplement le nom de *Jardin des plantes médicinales*, d'où le nom populaire de *Jardin des Plantes* qui lui est resté. Il fut fondé par Guy de Labrosse, en 1627, et entrait dans les attributions du premier médecin du Roi. Son premier intendant indépen-

dant fut le physicien Dufet qui eut pour successeur Buffon, qui l'agrandit beaucoup et lui donna une universelle réputation. En 1793, la Convention lui donna son nom actuel et le chargea de l'enseignement de l'Histoire naturelle dans toute son étendue et principalement dans ses applications à l'Agriculture, au Commerce et aux Arts. Il est devenu le centre de cet enseignement en France. Cet enseignement comporte 19 chaires, qui disposent de vastes laboratoires où les travailleurs sont admis ; il s'y ajoute une ménagerie étendue, un jardin botanique où les plantes sont classées par familles, des serres très riches en plantes exotiques, un laboratoire maritime situé primitivement dans la localité de Saint-Waast-la-Hougue, aujourd'hui installé à Saint-Servan, célèbre parmi les zoologistes et les botanistes. Mais le Muséum d'Histoire naturelle est un établissement unique par ses collections qui constituent l'état civil des trois règnes de la Nature.

L'Ecole de Médecine et de Pharmacie de Reims prépare au certificat d'études physiques, chimiques et naturelles et en délivre le diplôme. Elle possède de vastes laboratoires pourvus d'outillage moderne, de nombreuses collections et une riche bibliothèque contenant plus de dix mille volumes et recevant près de cinquante périodiques.

Les services de clinique sont installés à l'Hôpital civil situé à proximité de l'Ecole.

Les étudiants trouvent à la maison des Etudiants, créée par l'Association des Etudiants, sous le patronage du département, de la municipalité et de l'Ecole, une salle de travail à des conditions très avantageuses.

Chaque année à la suite de concours, l'Ecole distribue un certain nombre de prix dont quelques-uns sont dus à la libéralité de Fondateurs généreux.

A la suite de concours également sont nommés les internes et externes de l'Hôpital civil.

Doctorat de l'Université de Strasbourg et Doctorat ès sciences.

Des travaux de recherches en vue de l'obtention des Diplômes d'Etudes supérieures, du titre de Docteur de l'Université de Strasbourg (mention sciences) et du grade de Docteur ès sciences peuvent être poursuivis dans les divers Instituts scientifiques de l'Université sous la direction des professeurs.

CERTIFICATS D'ÉTUDES SUPÉRIEURES

La Faculté des Sciences de Strasbourg prépare aux Certificats d'Etudes supérieures de : *Calcul différentiel et intégral, Mécanique rationnelle, Astronomie, Astronomie approfondie, Mathématiques générales, Physique mathématique, Physique générale, Physique du globe, Chimie générale, Chimie appliquée, Chimie physique et Electrochimie, Minéralogie, Zoologie, Biologie générale, Botanique, Physiologie générale, Géologie, S. P. C. N.*

DIPLOMES UNIVERSITAIRES

La Faculté délivre, en outre, un diplôme d'Ingénieur-Chimiste, un diplôme d'Ingénieur de Géophysicien (mentions : météorologiste, aérologiste, sismologue, du diplôme de Géologue-Ingénieur, et un diplôme de l'Ecole Nationale supérieure du Pétrole et des Combustibles liquides (mentions : chimie, géologie, exploitation).

LE CORRESPONDANT

Religion, Philosophie, Politique, Histoire, Sciences Économie Sociale, Voyages, Littérature, Beaux-Arts.

Fondé en mars 1829, *le Correspondant* est la plus ancienne Revue française.

D'une très grande objectivité, et dirigé avec une indépendance totale soit des coteries politiques, soit de la finance, il a conquis une autorité incontestée, spécialement en ce qui touche les questions étrangères, où il se fait remarquer, de l'aveu général, par la documentation la mieux informée, le sens aigu des nécessités et des possibilités internationales, un esprit politique supérieur aux polémiques habituelles des partis.

Très fidèle aux grandes traditions de ses fondateurs et de ses illustres maîtres, il est ouvert aux plus consciencieuses recherches qui préparent le progrès.

Ce n'est pas un simple magazine : c'est une Revue d'idées et d'action, et l'élite le suit avec un vif intérêt parce qu'il a le courage de préférer aux mots qui flattent les vérités qui sauvent.

La Revue paraît le 10 et le 25 de chaque mois.

ABONNEMENTS : France et Colonies : un an : 90 fr. ; 6 mois : 46 fr. Un n° : 5 fr.

Establecimiento absolutamente de primer orden.

NOTES

ESPAÑA

En España la enseñanza secundaria se da en los establecimientos oficiales llamados *Institutos generales y técnicos*. Hay un bachillerato único, cuya duración es de 6 años de estudio. Se ingresa mediante un examen de admisión y después de cursadas y aprobadas en examenes parciales las diversas asignaturas de Ciencias y Letras, distribuidas en los seis años, se obtiene el grado de *Bachiller*, mediante un examen final ante los profesores del Instituto, sin ninguna intervención de la Universidad.

Recientemente ha creado el Gobierno, bajo la dirección de la *Junta para ampliación de estudios*, un nuevo Instituto-Escuela, donde se está ensayando un nuevo plan, con objeto de implantar en todos la reforma, si los resultados son satisfactorios. En este centro las enseñanzas se desarrollan libremente : no hay exámenes parciales : existe un período preparatorio de enseñanza primaria, y después de un ciclo de carácter general cuya duración normal es de cuatro años se bifurca la enseñanza en dos direcciones principales, una de Ciencias y otra de Letras, con otras intermedias según los deseos de cada familia. En la sección de Ciencias se llega hasta las primeras nociones de Cálculo infinitesimal, Geometría analítica y descriptiva.

La Facultad de Ciencias está dividida en cuatro secciones : Exactas, Físicas, Químicas y Naturales. Por el carácter demasiado elemental del actual bachillerato, el primer curso de la Facultad es preparatorio para los estudios propiamente universitarios. Al cabo de cuatro años de estudios en cualquiera de las secciones, y previo un examen de reválida, se obtiene el título de *Licenciado*. Para aspirar al título de *Doctor*, es preciso cursar ciertas enseñanzas especiales, y presentar una tesis á la aprobacion de la Facultad.

El título de licendiado es suficiente para aspirar al profesorado secundario ; el de doctor se exige para el profesorado universitario ; pero unos y otros aspirantes han de someterse a una serie de ejercicios teórico-prácticos, que constituyen las llamadas *oposiciones* á la cátedra vacante. Estos ejercicios de oposicion se verifican ante un tribunal nombrado por el Ministerio.

UNIVERSIDADES

Madrid (Central), Barcelona, Granada, Murcia, Oviedo, Salamanca, Santiago, Sevilla, otra Facultad de Medicina en Cádiz), Valencia, Valladolid, Zaragoza y Sección universitaria de La Laguna (Canarias).

Todas las Universidades, a excepción de la de Murcia y la sección universitaria de la Laguna, son de muy antigua creación. Solamente se distinguen las Universidades en el número de facultades que abarcan, y en que la de Madrid es la única que otorga el título de doctor.

Además de las enseñanzas, las Universidades cuentan con bibliotecas. También comprenden otros institutos científicos, laboratorios, etc.

España está dividida en once distritos universitarios, regidos cada uno por un Consejo; de estos dependen los demás establecimientos de enseñanza oficial que existen en las provincias.

Madrid comprende las provincias de Madrid, Ciudad Real, Cuenca, Guadalajara, Segovia y Toledo.

Barcelona, las de Barcelona, Gerona, Lérida, Tarragona e Islas Baleares.

Granada, las de Granada, Almería, Jaén y Málaga.

Oviedo las de Oviedo y León.

Salamanca, las de Salamanca, Avila, Cáceres y Zamora.

Santiago, las de La Coruña, Lugo, Orense y Pontevedra.

Sevilla, las de Sevilla, Badazoz, Cádiz, slas Canarias, Córdoba y Huelva.

Valencia, las de Valencia, Alicante y Castellón.
Valladolid, las de Valladolid, Alava, Burgos, Guipúzcoa, Palencia, Santander y Vizcaya.

Zaragoza, las de Zaragoza, Huesca, Logroño, Navarra, Soria y Teruel.
Murcia, las de Murcia y Albacete.

CLASES DE ENSEÑANZA

Hay dos clases de enseñanza : La oficial supone una participacion directa del alumno durante todo el curso, desde 1 de octubre hasta el 20 de mayo, en todos los trabajos de cátedra, laboratorios, clínicas y seminarios, aunque la asistencia es voluntaria, segun Real decreto de 7 de enero de 1916.

La enseñanza no oficial, llamada tambien libre o privada, solo se manifiesta en la presentación del alumno a los exámenes por asignaturas en los meses de Junio y Septiembre ante tribunales que se anuncian en el mes de Mayo.

Al expedirse los respectivos títulos, no se hace mención alguna especial del carácter oficial o libre de los estudios a que se refieren.

Matriculas.

Para matricularse en el curso preparatorio de Facultad bastará acreditar la aprobación de los ejercicios del grado de Bachiller.

Para sacar las papeletas de examen, es absolutamente indispensable hallarse en posesión de este título.

Para matricularse con validez académica en cualquiera de las facultades universitarias son necesarios los requisitos siguientes : haber obtenido el grado de Bachiller, tener aprobadas todas las asignaturas del curso preparatorio en las facultades donde esta preparación se exige, cuales son la de Derecho, la de Medicina y la de Farmacia.

EXAMENES

Las calificaciones en los exámenes de asignaturas serán las de Sobresaliente, Aprobado y Suspenso.

ENSEÑANZA OFICIAL

En la enseñanza oficial es potestativo del Profesor el examinar a los alumnos.

El examen se hace únicamente ante el Profesor sin constituir tribunal. Comienzan los exámenes el 20 de mayo.

Título de Licenciado.

El ejercicio de reválida fué suprimido por Real decreto de 10 de mayo de 1917. Allí se establece que las enseñanzas se consideran definitivamente terminadas con la aprobación de las asignaturas correspondientes, establecidas en el plan por el cual hubiese comenzado o seguido el alumno sus estudios.

Aprobadas las asignaturas del plan será expedido el título a solicitud del alumno de sus representantes legales.

No obstante lo que queda dispuesto, y mientras no se modifica lo establecido en materia de derechos de Hacienda, se satisfarán para la obtención del título las cantidades correspondientes a los antiguos ejercicios de grado o de reválida.

Para el grado de Licenciado es preciso el abono de 37,50 pesetas en pape de pagos a Estado.

Número de estudientes (1925-1926) : 169.

Director : **V. Machimbarrena y Gogorza.**

Secretario : **C. de Orduña y Zarauz.**

Objeto de la Escuela. — El objeto de la Escuela de Ingenieros de Caminos Canales y Puertos, es dar la enseñanza completa de esta profesión.

Enseñanzas :

Primer año.

Cálculo infinitesimal : **P. Fernández Quintana.**
Geometría descriptiva : **J. Granda Calleja.**
Física : **P. Fernández Quintana.**
Química, materiales de construcción : **A. L. Fremco.**
Dibujo y Trabajos gráficos y de Laboratorio : **J. Cebada Ruiz.**
Inglés : **N. Puig de la Bellacasa.**

Segundo año.

Mecánica racional : **F. Casares Bescansa.**
Geología : **N. Puig de la Bellacasa.**
Topografía y Geodesia : **E. Picó y Naya.**
Electrotecnia (primer curso) : **L. Sanchez Cuervo.**
Dibujo y Trabajos gráficos y de Laboratorio : **J. Cebada.**

Tercer año.

Materiales metálicos : **L. Franco**
Hidráulica é Hidrología : **P. M. Gonzalez Quijano.**
Resistencia y estabilidad : **B. Granda y Calleja.**
Electrotecnia (primer curso) : **S. Zufiaurre y Goicoechea.**
Derecho administrativo y legislación de O. P. : **D. Mendizábal.**
Termotecnia : **J. Cebada y Ruiz.**
Ejercicios prácticos : **J. Cebada.**

Cuarto año.

Hidráulica aplicada : **D. José, L. Gómez Navarro.**
Cimientos, Obras de Fábrica y Hormigón armado : **J. E. Ribera Dutasta.**
Caminos (primer curso) : **M. Aguilar López.**
Hormigón Armado : **A. Póña.**
Arquitectura : **G. Diego.**

Quinto año.

Estructuras y Puentes métalicos : **D. Mendirabal.**
Ingeniería sanitaria, ríos, canales y pantanos : **A. Sonier y Puerta.**
Caminos (2° curso) : **A. Prieto Vives.**
Puertos favos y hormigón armado : **R. H. Mateos.**
Proyectos de conjunto (primer curso) : **D. Enrique Colás Avias.**
Economica política, Legislación : **C. de Orduña.**

Sexto año.

(De 1° de Julio a 31 de Diciembre).

Doctrinas económicas : **C. Orduña.**
Radiotécnica : **F. Quintana.**
Aviación : **W. Laffont.**
Biología : Doctores **Luengo y Mansanete.**
Proyectos de fin de Carrera : **E. Colas y Arias.**

Objeto de la Escuela. — La escuela especial de Ingenieros de Minas tiene por objeto la enseñanza completa de los conocimientos necesarios para ejercer en España esa profesión y para pertenecer al Cuerpo Nacional de Minas.

Profesores :

Primer año.

Mecánica Racional : **E. Lacasa y Moreno.**
Geometría Descriptiva : **A. Montenegro Irisarri.**
Física Termodinámica : **L. Forrat.**
Topografía : **M. Langreo Contreras.**
Dibujo : **A. Montenegro Irisarri.**

Segundo año.

Química General : **L. Gamir y Espina.**
Mecánica aplicada : **E. González Llana.**
Hidraulica : **E. Gonzalez Llana.**
Trigonometría y Geodesia : **M. Langreo Contreras.**
Derecho : **J. Prats y García Olalla.**
Dibujo : **A. Montenegro Irisarri.**

Tercer año.

Mecanismos : **M. Querjeta Goena.**
Mineralogía : **E. de Pineda, S. Ocaña.**
Química Analítica : **D. Manuel Abbad y Boned.**
Paleontología : **L. Jordana y Soler.**
Química Industrial : **L. Gamirly Espina.**
Electrotecnia (1° curso) : **M. Querjeta Goena.**
Dibujo : **A. Montenegro Irisarri.**

Cuarto año.

Construcción : **J. Alfaro Cordon.**
Geología : **P. Fábrega y Coello.**
Metalurgia general : **D. Juan Jesus Juzlarte.**
Electrotecnia (2° curso) : **M. Querjeta Goena.**

Quinto año.

Laboreo de Minas : **F. Gómez Rojas.**
Siderurgia : **D. Eustaquio Fernandez Mirando.**
Metalurgia Especial : **A. Marín y Hervás.**
Criaderos minerales : **P. Fábrega y Coello.**
Transportes : **J. A. Cordon.**

Decano : **J. Mur y Ainsa.** — *Secretario* : **E. Jimeno Gil.**

Lista de Catredráticos :

Estudios comunes a varias Secciones :

Análisis matemático (1° y 2° curso)(*e. f. a*) : **N...**
Geometría métrica (*e. f. q.*) **J. Mur y Ainsa.**
Química general (*e. f. q. n.*) : **N...**
Geometría analítica (*e. f. q.*) : **J. Mur y Ainsa.**
Física general (*e. f. q. n.*) : **E. Alcobé y Arenas.**
Elementos de cálculo infinitesimal (*e. f.*): **D. Marín y Toyos.**
Cosmografía y Física del Globo (*e. f.*) : **A. Berenguer y Ballester.**
Complementos de Física (*e. f. q. n.*) : **A. Vila Nadal.**
Complementos de Matemáticas (*n. q.*) : **J. Mur Ainsa.**
Fisiología general (*n. a.*) : **E. Fernández Galiano.**
Complementos de Química (*Medica y Farmacia*) : **J. Fuset Tubiá.**
Complementos de Biología (*Medicina*) : **J. Fuset Tubiá.**
Mecánica racional (*e. f.*) : **E. Fontseré y Riba.**
Biología (*q. n.*) : **J. Fuset y Tubiá.**
Geología (*q. n.*) : **A. Vila y Nadal.**
Cristalografía (*n.*) : **F. Pardillo y Vaquer.**

Sección de Ciencias exactas.

Geometría de posición : **A. Torroja Miret.**
Geometría descriptiva y Geodesia : **A. Torroja Miret.**
Astronomía esférica y Geodesia : **A. Berenguer y Ballester.**
Complemento de cálculo infinitesimal : **D. Marín y Toyos.**
Astronomía general : **A. Berenguer Ballester.**
Matemáticas (*Análisis infinitesimal y Geometría analítica*) : **J. Mur Ainsa.**

Sección de Ciencias físicas.

Acústica y Óptica : **N...**
Termología : **E. Alcobé y Arenas.**
Electricidad y Magnetismo : **N...**

Sección de Ciencias químicas.

Química inorgánica (1° y 2° curso) : **E. Jimeno Gil.**
Química orgánica (1° y 2° curso) : **A. García Banús.**

Química analítica (1° y 2° curso) : **E. Jimeno Gil.**
Electroquímica : **E. Jimeno Gil.**
Química técnica : **A. García Banús.**
Química teórica : **A. García Banús.**
Ampliación de Física : **E. Alcobé Arenas.**
Matemáticas especiales (1° curso) : **E. Fontserè Riba.**
Matemáticas especiales (2° curso) : **J. Mur Ainsa.**

Sección de Ciencias naturales.

Complemento de Algebra y Geometría : **E. Fontseré y Riba.**
Geografía y Geología dinámica : **M. San Miguel de la Cámara.**
Técnica micrográfica e Histología vegetal y animal : **E. Fernández Galiano.**
Organografía y Fisiología vegetal : Vacante.
Organografía y Fisiología animal : **E. Fernández Galiano.**
Mineralogía descriptiva : **F. Pardillo y Vaquer.**
Zoografía de animales inferiores y moluscos : **A. Vila Nadal.**
Geología geognóstica y estatigrafica : **M. San Miguel de la Cámara.**
Fitografía y Geografía botánica : Vacante.
Zoografía de articulados : Vacante.
Zoografía de vertebrados : **J. Fuset y Tubía.**
Antropología : **T. de Avanzadi Unamuno.**
Psicología experimental : **T. de Avanzadi Unamuno.**
Ciencias geológicas : **M. San Miguel de la Cámara.**

Facultad de Derecho (1929).

Decano : **J. Gómez del Campillo.**

Secretario : **B. Perez Gonzalez.**

Catedráticos :

Instituciones de Derecho romano : **E. Díaz y González.**
Elementos de Derecho natural : **G. del Castillo Alonso.**
Economía política ; Elementos de Hacienda pública : **J. Algara Postius.**
Historia general del Derecho español : **G. Sanchez Sánchez.**
Derecho político español comparado con el extranjero : **G. del Castillo y Alonso.**

Derecho internacional privado : **J. M. Trias de Bes.**
Procedimientos judiciales. Práctiva forense : **J. Xirau Palau.**

Facultad de Medicina (1929).

Decano : **E. Oliver Aznar.** — *Secretario* : **M. Saforcada.**

Catedráticos :

Anatomía descriptiva y Embriología (1° y 2° curso) : **A. Riera y Villaret, S. Gil Vernét.**
Histología e Histoquimia normales : Anatomía patologica : **A. A. Ferrer Cajigal.**
Técnica Anatomica (1° y 2° curso) : **A. Riera y Villaret, S. Gil Vernét.**
Fisiología humana : **A. Pi Suñer.**
Higiene con prácticas de Bacteriología sanitaria : **A. Salvat Navarro.**
Patología general con su clínica : **E. Oliver y Aznar.**
Terapéutica : Dr. **D. J. M. Bellido.**
Patología quirúrgica con su clínica (1°, 2°, 3° curso) : **A. Trias Pujol, I. Trias Pujol, J. M. Bastrina Thomas.**
Anatomía topográfica : **J. Trías Pujol.**
Patología médica con su clínica (1°, 2° y 3° curso) : **F. Fesser Solevoiciens. A. Pedro Pons, A. A. Ferrer Cagigal.**
Obstetricia con su clínica : **P. Nubiola Espinós.**
Ginecología con su clínica : **M. Bonafonte Nogués.**
Enfermedades de la infancia : **A. Martínez Vargas.**
Medicina legal y Toxicología : **M. Saforcada.**
Oftalmología con su clínica : **M. Soria Escudero.**

Enfermedades de los oídos, narizylaringe con su clínica : **F. Casadesus Castells.**
Sifiliografía y Dermatología con su clínica : **J. Peyri Rocamora.**
Urología : **S. Gil Vernét.**
Carrera de Practicante : **A. Morales Llorens.**
Carrera de Matrona : **D. Agustí Planell.**

Instituto de Fisiología (1929).

Director : **A. Pi-Suñer.** — *Subdirector* : **J. M. Bellido.**

Asistentes : **J. Puche, J. Pi-Suñer-Bayo, M. Farran, F. Fernandez-Riofrio, J. Bofill, F. Domenech-Alsina, J. Raventos, R. Carrasco-Formiguera.**

Facultad de Farmacia.

Decano : **J. Goizueta y Diaz.** — *Secretario* : **S. Tayá Filella.**

Catedráticos :

Mineralogía y Zoología aplicadas á la Farmacia y materia farmacéutica con sus prácticas : **J. Goizueta y Díaz.**
Botánica descriptiva con sus prácticas : **C. Cortès Latorre.**
Química inorgánica aplicada á la Farmacia y practicas de Laboratorio : **J. Deulofeu Poch.**
Materia farmacéutica vegetal con sus practicas : **F. J. Palomas Bons.**
Químicas organica aplicada á la Farmacia con sus prácticas : **C. Torres González**
Técnica física aplicada a la Farmacia con sus prácticas ; Análisis químico y en particular de los alimentos y venenos : Prácticas de Laboratorio : **R. Casamada y Mauri.**
Farmacia práctica y Legislación relativa a la Farmacia ; Prácticas en la preparación de medicinas y despacho de recetas : **E. Soler y Batlle.**
Higiene pública : Se cursa en la Facultad de Medicina.

Analisis químico : **N. Olivan Parlacin.**
Agrologia y Geologia : **M. San Miguel de la Cámara.**
Geografía y Comercio agricolas : **R. Espoy y de Samá.**
Viticultura y Enologia : **C. Oliveras.**

Preparadores

R. Bardia, B. Fernandez Riofrio, J. Martinez Molina, R. Oliveras Ferrer, Mi. Guigarro Lledo.

BARCELONA

Escuela Superior de Arquitectura.

Universidad literaria de Barcelona.

Director : **F. de P. Nebot y Torrens.** — *Secretario* : **E. Catá y Catá**

Estudios preparatorios :

Primer año.

Cálculo infinitesimal : **A. Dardery y Marsá.**
Geometría descriptiva y Perspectiva : **E. Catá y Catá.**
Ejercicios prácticos de las mismas : **E. Catá y Catá.**
Copia de elementos ornamentales : **N...**

Estudios superiores :

Primer año.

Conocimiento de materiales : **A. Soler y March.**
Electrotecnia y máquinas : **A. Darder y Marsá.**
Construcción (Primer curso) : **A. Florensa y Ferrer.**
Resistencia de materiales : **J. Bayá y Font.**
Copia de conjuntos : **F. de P. Nebot y Torrens.**

Segundo año.

Construcción (Segundo curso) : **E. P. Condoya y Oscoz.**
Hidráulica : **J. Bayó y Font.**
Teoría del Arte : **E. Bona y Puig.**
Proyectos de detalles : **F. de Azúa y Pastors.**

Segundo año.

Mecánica racional : **A. Florensa y Ferrer.**
Historia de las Artes plásticas : **A. Calzada y Echevarría.**
Modelado en barro : **J. Fujol y Gisbert.**
Detalles arquitectónicos : **J. Fujol y Gisbert.**

Tercer año.

Tecnología : **G. Borrell y Cardona.**
Salubridad é higiene : **A. Soler y March.**
Topografía : **A. Llopart y Vilalta.**
Composición de edificios : **E. Bona y Puig.**
Proyectos de conjuntos (Primer curso) : **P. Domenech y Roura.**

Cuarto año.

Arquitectura legal : **G. Borrell y Cardona.**
Historia de la Arquitectura : **A. Calzada y Echevarría.**
Trazado y urbanización de poblaciones : **A. Llopart y Vilalta.**
Proyectos de conjuntos (Segundo curso) : **P. Domenech y Roura.**

BARCELONA

Escuela de Ingenieros industrales.

Director : **P. Castells Vidal.** — *Secretario* : **A. Ferrán y Degrié.**
Contador : **J. Mañas Bonví.** — *Bibliotecario* : **L. Clariana.**
(1) = Professor auxiliar.

Primer curso.

Análisis matemático : **P. Castells Vidal, A. García Font** (1), **P. Pujol Matabosch** (1).
Geometría descriptiva : **F. Gómez Carbo-**

nell, P. Nicolau Mulet (1), R. Oliveras Ferrer (1).

Química inorgánica y orgánica : J. Mañas Bonví, M. Useros García (1), E. Miquela y Felíu (1).

Dibujo artístico industrial y topográfico : C. Cornet Palau, R. Moncunill Baucells (1), L. Masnou Pujol (1), P. Brossa (1).

Segundo curso.

Cálculo integral y Mecánica racional : F. Tallada Comellas, L. Clariana Roca (1), J. Xancó Roig.

Estereotomía : J. M. Lasarte Pessino (1), A. Gaya Busquets (1).

Física industrial (1° curso) : J. Mañas Bonví, M. Useros García (1), E. Miquela y Felíu (1).

Dibujo de taller : C. Cornet Palau, R. Moncunill Baucells (1), L. Masnou Pujol (1), P. Brossa (1).

Tercer curso.

Teoría general de las máquinas : J. Galí Fabra, I. Lana Sarrate (1), J. M. Sandoval Campderá (1).

Física industrial (2° curso): A. Robert Rodríguez, R. Casanovas Degollada (1), J. M. Guindulain (1).

Topografía y nociones de geodesia : R. Vilamitjana Masdevall, E. Gutierrez Diaz, B. M. Sandoval Campderá (1).

Análisis químico : A. Ferrán Degrie, E. Gil Camporro (1), J. M. Puig Martí.

Mecánica aplicada a la construcción : R. Vilamitjana Masdeval, E. Gutierrez Diaz, B. M. Sandoval Campderá (1).

Dibujo de proyectos : C. Cornet y Palau, P. Moncunill Baucells (1), L. Masnou Pujol (1).

Cuarto curso.

Química industrial inorgánica : A. Ferrán y Degrié, E. Gil Camporro (1), J. M. Puig Martí.

Física industrial (3° curso), *Electricidad* : A. Robert y Rodríguez, R. Casanovas Degollada (1), J. M. Guindulain (1).

Metalurgia general y Siderurgia : B. Lassaletta y Perrín, J. M. Grau (1), M. Cardelús Carrera (1).

Teoría especial de las máquinas, Hidráulica (1° curso) : J. Galí y Fabra (1), I. Lana Sarrate, J. M. Sandoval Campderá (1).

Dibujo de proyectos : C. Cornet y Palau, R. Moncunill Baucells (1), L. Masnou Pujol (1).

Quinto curso.

Teoría especial de las máquinas (2° curso) : R. Marqués Fabra, J. Gelpí Blanco (1), E. Muñoz Gómis (1).

Química industrial orgánica : R. Oliveras Massó, L. Daunis Grau (1), J. Dalmau Domingo (1).

Física industrial (4° curso), *Electrotecnia* : B. Lassaletta y Perrín, J. M. Grau, M. Cardelus Carrera (1).

Construcción y Arquitectura industrial : J. M. Lasarte y Pessino (1), A. Gaya Busquets (1).

Dibujo de proyectos : C. Cornety Palau, R. Moncunill Baucells (1), L. Masnou Pujol (1).

Sexto curso.

Tintorería y Artes cerámicas : R. Oliveras Massó, L. Daunis Grau (1), J. Dalmau Domingo (1).

Construcción de máquinas : R. Marqués Fabra, J. Gelpí Blanco (1), E. Muñoz Gómis (1).

Tecnología mecánica : J. Tous y Biaggi, J. Ortès Parera, A. de Quintana.

Ferrocarriles : J. Tous y Biaggi, J. Ortès Parera, A. de Quintana.

Economía política. Legislación industrial y Estadística : F. Gómez Carbonnell, P. Nicolau Mulet (1), R. Oliveras Ferrer (1).

Dibujo de proyectos : C. Cornet y Palau, R. Moncunill Baucells (1), L. Masnou Pujol (1).

Plaza de la República n° 3.

Fundada en 1899.

Número de alumnos (1928-1929) : 378.

Director : **L. Checa Toral.** — *Secretario* : **J. Prat.**

Bibliotecario : **J. Ballvé Martinez.**

(1) = Profesorado auxiliar.

Primer curso.

Análisis matemático : **C. de Madariaga. R. Rica** (1).
Geometria descriptiva : **S. Alonso** (1).
Química inorgánica y orgánica : **J. Prat.**
Dibujo artistico industrial y topográfico : **J. Suarez.**

Segundo curso.

Cálculo integral y Mecánica racional : **E. Belda.**
Estereotomia : **J. Salenz.**
Física industrial (1° curso) : **F. Ara** (1).
Dibujo de taller : **J. Suarez.**
Física Química : **E. Belda.**
Topografia y Geodesia : **F. Ara.**

Tercer curso.

Teoria general de las máquinas : **P. Mendizabal** (1).
Análisis química : **S. Recalde.**
Mecánica aplicada a la construcción : **J. Torróntegui** (1).
Aplicaciones industriales del calor : **L. Mellado.**
Hydraulice y maquinas hydraulicas : **P. Mendizabal.**
Proyectos : Los Profesores de las asignaturas.

Cuarto curso.

Química industrial inorgánica : **S. Recalde.**
Física industrial (3° curso) : **L. Checa.**
Metalurgia general y Siderurgia : **P. Berroya.**
Teoria especial de lás maquinas (1° curso) : **P. Mendizabal** (1).

Quinto curso.

CADIZ

Facultad de Medicinal (1928).

(Universidad de Sevilla).

Decano : **L. Rodrigo Lavín.** — *Secretario* : **G. Ceballos.**

Catedráticos :

Fisiología humana : **L. R. Lavín**, decano,
Técnica Anatómica (1° y 2° cursos) : **J. C. Bonet.**
Anatomía : **F. Múñez Romero.**
Higiene con prácticas de Bacteriología sanitaria : **A. Urtebey y Pastorino.**
Anatomía topográfica : **E. Alcina y Quesada.**
Obstetricia con su clínica : **E. Muñoz Beato.**
Ginecología con su clínica : **J. M. Pineda y García de los Ríos.**
Enfermedades de la Infancia : **R. Ventiny Conde.**
Oftalmología : Vacat.
Terapéutica : **V. Belloch Montesinos.**
Patología médica con su clínica (1°, 2° y 3° cursos) : **V. Calvo Criado.**
Oto-Rino-Laringología : **J. Portela González.**
Histología e Histoquimia normales : Vacat.
Patología general con su clínica : Vacat.
Medicina legal y Toxicología : Vacat.

CORDOBA

Escuela de Veterinaria de Cordoba.

Director : **G. Bellido Luque.** — *Secretario* : **J. Saraza Murcia.**

Catedráticos : *Histología normal y Patología general* : **G. Saldaña Sicilia.** — *Anatomía descriptiva* : **R. García Suarez.** — *Fisiología e Higiene* : **R. Martín Merlo.** — *Parasitología, Bacteriología, etc.* : **D. G. Facultad de Ciencias

Geometría métrica y analítica (4.º, 1.º y 2.º) : J. A. Tornero Díaz.
Química general (4.º, 1.º, 1.º y 2.º) : J. I. Bacaral.
Física general (4.º, 1.º, 1.º y 2.º) : A. Aguilar Soriano.
Geología con nociones de Mineralogía (4.º, 2.º) : P. Sánchez Vila.
Biología con nociones de Mineralogía (4.º, 2.º) : P. Sánchez Vila.
Aparatos eléctricos para gabinete : J. A. Tornero Díaz.

Facultad de Derecho

Derecho natural : A. Mesa Matos.
Derecho político, civil y penal (1.º y 2.º curso) : J. Martín de la Fuente. C. García Valdecasas y Pérez.
Derecho administrativo : A. Mesa Matos.
Derecho mercantil de España y principales naciones de Europa y América : E. Largo y Ruiz.
Derecho internacional público : [illegible] F. Fernández de Córdoba y Martín.

Facultad de Medicina

Anatomía descriptiva y Embriología (1.º y 2.º curso) : M. Gil del Gal. E. Gómez Escalla.
Anatomía descriptiva : A. M. Gualdis.
Terapéutica general (1.º y 2.º curso) : G. Sánchez Aguilar.
Patología general con su clínica : A. Aguilar de Cabeza y Ortiz.
Patología general con su clínica : A. Aguilar y Díaz.
Patología general con su clínica : S. Velázquez de Castro Pérez.
Patología externa con su clínica (1.º, 2.º y 3.º curso) : F. Castillo y Quintana. F. Mesa y Matos. V. Escudero García.
Obstetricia (1.º y 2.º curso) : G. F. Fernández Ortiz. F. Escudero Martínez. G. F. Fernández Ortiz.
Oftalmología con su clínica : A. Ortiz Fernández.
Otología con su clínica : J. Martín Serrano.
Curso de las enfermedades de la infancia : J. Pareja Ferreiro.

Medicina legal y Toxicología : **R. Alvarez de Toledo.**
Oftalmología con su clínica : **R. García Duarte.**
Enfermedades del oído, nariz y laringe con su clínica : **F. Oloriz y Ortega.**
Sifiligrafía y Dermatología con su clínica : **J. Pareja y Garrido.**

Facultad de Farmacia (1929).

Decano : **J. L. Díez Tortosa.** — *Secretario* : **R. Serrano.**

Catedráticos :

Aplicaciones de la Física y de la Química-física ; Análisis químico y en particular de los alimentos, medicamentos y venenos ; Prácticas de Laboratorio : **J. M. Clavera.**
Mineralogía y Zoología aplicadas á la Farmacia y materia farmacéutica; con sus prácticas : **C. Rodríguez y López Neyra de Gorgot.**
Botánica descriptiva con sus prácticas : **J. L. Díez Tortosa.**
Química inorgánica aplicada á la Farmacia y prácticas de Laboratorio : **J. Dorronsoro.**
Materia farmacéutica vegetal con sus prácticas : **R. Serrano.**
Química orgánica aplicada á la Farmacia con sus prácticas : **J. Nacle Herrera.**
Farmacia práctica y Legislación relativa á la Farmacia ; Prácticas en la preparación de medicinas y despacho de las recetas : **J. García Vélez.**
Higiene pública : Se cursa en la Facultad de Medicina.

MURCIA

Universidad de Murcia.

Fundada en 1915.
